TOM DEUSCHLE  
DEPARTMENT DIRECTOR

Dear Reader:

A goal of the Missouri Department of Labor and Industrial Relations (DOLIR) is to ensure that Missouri workers have safe and healthy workplaces. Unsafe workplaces endanger the health and safety of Missouri's workforce. Workplace injuries, illnesses, and fatalities decrease employers' productivity and increase production and insurance costs. Improved working conditions will contribute to a decrease in workplace accidents, illnesses, and fatalities. Missouri workplaces can be safer by identifying and eliminating workplace hazards. Identification and elimination of workplace hazards results in lower workers' compensation insurance costs, lower costs to employers for lost wages and medical care for the injured worker, and improved employee productivity, product quality, and job satisfaction.

The Survey of Occupational Injuries and Illnesses is a federal/state program in which employer reports are collected from private industry employers. The DOLIR Research and Analysis Section, in cooperation with the Bureau of Labor Statistics (BLS), processes survey reports from approximately 5,400 private industry establishments each year. The Survey reports the incidence rates of injury and illness cases. The rates are useful to evaluate the safety performance of a particular industry over time. The status of occupational safety and health in Missouri workplaces and workplace hazards can be identified from the Survey. The results of the 2003 Survey of Occupational Injuries and Illnesses are presented in this report.

The BLS in conjunction with the DOLIR Research and Analysis Section administers the Census of Fatal Occupational Injuries (CFOI) program to produce counts of fatal workplace injuries that occur during a given year. Data compiled by the CFOI program are used by safety and health professionals, policy analysts, and researchers to prevent fatal work injuries by informing workers of life threatening hazards associated with various jobs, promote safer work practices through enhanced job safety training, develop new safety equipment, assess and improve workplace safety standards, and identify new areas for safety research. The 2003 CFOI results are also presented in this report.

Sincerely,

Tom Deuschle  
Director

# Introduction

The Survey of Occupational Injuries and Illnesses is a Federal/State program in which employer report forms are collected from private industry employers. State agencies collect and process the survey data and prepare estimates using standardized procedures established by the Bureau of Labor Statistics (BLS), U.S. Department of Labor to insure uniformity and consistency between states. The Missouri Department of Labor and Industrial Relations, Research and Analysis Section, in cooperation with the BLS, processes survey reports from approximately 5,400 private industry establishments annually.

The Occupational Safety and Health Act of 1970 implemented regulations requiring most private industry employers to maintain records and prepare reports on work-related injuries and illnesses. The BLS was given the responsibility to develop a comprehensive statistical system for work-related injuries, illnesses, and deaths in private industry. In 1972, the BLS, in cooperation with many state governments, designed an annual survey to estimate the number and frequency of work-related injuries and illnesses by detailed industry for the Nation and for States participating in the survey. The survey information is valuable to the safety community to assist with allocating prevention resources.

In 1992, the survey information on nonfatal incidents involving days away from work was expanded to describe the occupation and other demographic information of workers who incur the work-related injuries and illnesses, the nature of the conditions and how they occurred, and the time away from work. The survey reports the incidence rates of injury and illness cases that allow the comparison among industries and establishments of varying sizes. Measures of injuries and illnesses are expressed as a constant to allow for a common statistical base across industries regardless of employment size of establishment. The rates are useful to evaluate the safety performance of a particular industry over time or to compare an industry's safety record between states.

The Occupational Safety and Health Administration (OSHA) revised the requirements for recording occupational injuries and illnesses, effective January 1, 2002. The estimates from the 2002 survey are not comparable with those from previous years due to the revised recordkeeping rule.

The Survey of Occupational Injuries and Illnesses began using the 2002 North American Industry Classification System (NAICS) in 2003. The survey had used the Standard Industrial Classification (SIC) system prior to 2003. There are substantial differences between these systems that result in breaks in the series for industry data. NAICS recognizes hundreds of new businesses in the United States economy, especially in the service providing sector. NAICS classifies establishments into a detailed industry based on the production processes and provided services. The estimates by industry categories from the 2003 survey are not comparable with those from previous years due to the conversion to NAICS.

The Survey of Occupational Injuries and Illnesses measures nonfatal injuries and illnesses only. The survey excludes the self-employed; farms with fewer than 11 employees; private households; Federal government agencies; and, for national estimates, employees in State and local government agencies. The goods producing sectors consist of the following industry sectors: agriculture, forestry, fishing, and hunting (NAICS sector 11); mining (NAICS sector 21); construction (NAICS sector 23); and manufacturing (NAICS sector 31-33). The service providing sectors include the following industry sectors: wholesale trade (NAICS sector 42); retail trade (NAICS sector 44-45); transportation and warehousing (NAICS sector 48-49); utilities (NAICS sector 22); information (NAICS sector 51); finance and insurance (NAICS sector 52); real estate and rental and leasing (NAICS sector 53); professional, scientific, and technical services (NAICS sector 54); management of companies and enterprises (NAICS sector 55); administrative and support and waste management and remediation services (NAICS sector 56); educational services (NAICS sector 61); health care and social assistance (NAICS sector 62); arts, entertainment, and recreation (NAICS sector 71); accommodation and food services (NAICS sector 72); other services (except public administration) (NAICS sector 81); and public administration (NAICS sector 92).

The BLS grouped related sectors into major industry sectors to help standardize the industry aggregations above the NAICS level. There are three goods-producing major industry sectors. Natural resources and mining is the aggregate of sector 11 (agriculture, forestry, fishing, and hunting) and sector 21 (mining). Construction is the aggregate of sector 23 (construction). Manufacturing is the aggregate for sector 31-33 (manufacturing). There are eight service-providing major industry sectors. Trade, transportation, and utilities is the aggregate for sector 42 (wholesale trade), sector 44-45 (retail trade), sector 48-49 (transportation and warehousing), and sector 22 (utilities). Information is the aggregate for sector 51 (information). Financial activities is the aggregate for sector 52 (finance and insurance) and sector 53 (real estate and rental and leasing). Professional and business services is the aggregate of sector 54 (professional, scientific, and technical services), sector 55 (management of companies and enterprises), and sector 56 (administrative and support and waste management and remediation services). Education and health services is the aggregate of sector 61 (educational services) and sector 62 (health care and social assistance). Leisure and hospitality is the aggregate for sector 71 (arts, entertainment, and recreation) and sector 72 (accommodation and food services). Other services is the aggregate for sector 81 (other services, except public administration). Public administration is the aggregate for sector 92 (public administration). The BLS has generated estimates of injuries and illnesses for many of the 2-, 3-, 4-, 5-, and 6-digit private sector industries as defined in the 2002 *North American Industry Classification Manual*, as well as for major industry sectors, total of all goods-producing sectors, and total of all service-providing sectors.

The Mine Safety and Health Administration of the U.S. Department of Labor and Federal Railroad Administration of the U.S. Department of Transportation provide occupational injury and illness data for coal, metal, and nonmetal mining and for railroad activities. These two agencies did not adopt the revised OSHA recordkeeping requirements for 2003 so estimates for these industries for 2003 are not comparable with estimates for other industries.

The incidence rates and numbers of injury and illness cases are based on logs and records kept by private industry employers throughout the calendar year. Information from the logs is used by the survey to develop estimates of the numbers and incidence rates of nonfatal occupational injuries and illnesses. The BLS survey collects the number of hours worked to be used to determine industry and case characteristics incidence rates. The survey records reflect the year's occupational injuries and illnesses as well as the employer's comprehension of which cases are work related using the record-keeping guidelines of the U.S. Department of Labor. Changes in the level of economic activity, working conditions and work practices, worker experience and training, and the number of hours worked can have an effect on the number of injuries and illnesses reported in a given year.

The BLS Survey of Occupational Injuries and Illnesses provides information on characteristics, such as occupations, age, sex, race, and length of service, of occupational injuries and illnesses involving days away from work. The survey also includes data concerning the circumstances of the injury or illness, including nature of the injury or illness, part of body affected, event or exposure, and primary and secondary sources of the injury or illness.

Nonfatal occupational injuries are defined as involving one or more of the following: loss of consciousness, restriction of work or motion, transfer to another job, or medical treatment (other than first aid). An occupational injury is defined as an injury, such as a cut, fracture, sprain, strain, amputation, etc., that results from a work event or from a single instantaneous exposure in the work environment. An occupational illness is defined as any abnormal condition or disorder, other than one resulting from an occupational injury, caused by exposure to factors associated with employment. Occupational illnesses include acute and chronic illnesses or diseases that may be caused by inhalation, absorption, ingestion, or direct contact. The revised recordkeeping guidelines no longer provide categories to separately record cases such as disorders associated with repeated trauma or disorders due to physical agents. These illness cases are now being recorded in the all other illnesses category.

Cases with days away from work, job transfer, or restriction involved recuperation away from work, transfer to another job, restricted duties at work, or a combination of these actions. Other recordable cases did not result in time away from work. There are two types of cases with days away from work, job transfer or restriction. The first type requires at least one day away from work, with or without

job transfer or restricted work activity. The second type requires only job transfer or restriction. Job transfer or restriction cases may involve shortened work hours, a temporary job change, or temporary restrictions on certain duties of a worker's regular job. Incidence rates denote the number of injuries and/or illnesses per a specified number of full-time workers.

The survey estimates for the characteristics of cases with days away from work are based on a scientifically selected probability sample instead of a census of the entire private industry population. Private industry establishments were selected to represent themselves and other establishments of the same industry and employment size that were not selected to participate in the survey for the reporting year. Selected establishments that were anticipated to have large numbers of days away from work cases were given instructions prior to the survey on how to sample the cases to minimize the burden of their response.

A standard error is calculated to determine the precision of each injury and illness estimate. The standard error defines a confidence interval (range) around the estimate. The approximate 95 percent confidence interval is the estimate plus or minus two times the standard error. The standard error can be expressed as the relative standard error, or percent of the estimate. At the 95 percent confidence level, one can be 95 percent confident that the actual incidence rate falls within the confidence interval.

The survey can be used as an indicator of the magnitude of occupational safety and health problems. The statistics can help determine which industries need to improve safety programs and to assess the effectiveness of the Occupational Safety and Health Act in reducing work related injuries and illnesses. Labor and management can use the estimates obtained in the survey to evaluate safety programs. Other users include insurance carriers involved in workers' compensation, industrial hygienists, manufacturers of safety equipment, researchers, and others concerned with job safety and health.

Summary data presents numbers and incidence rates of nonfatal occupational injuries and illnesses in Missouri private industry. Data is presented for industries and industry sectors classified by NAICS codes. Numbers and incidence rates of occupational injuries and illnesses are presented for different types of cases: total recordable cases; total cases with days away from work, job transfer or restriction; cases with days away from work; cases with job transfer or restriction; and other recordable cases. Incidence rates and numbers of occupational illnesses are presented by category of illness.

The number and incidence rate of total recordable nonfatal occupational injuries and illnesses in Missouri private industry were reduced again in 2003. There were a total of 94,900 nonfatal occupational injuries and illnesses in Missouri private industry in 2003. This number was reduced from 112,900 in 2002, 118,400 in 2001, and 132,000 in 2000. The incidence rate (number of

injuries and illnesses per 100 full-time workers) for total recordable cases of nonfatal occupational injuries and illnesses in Missouri private industry in 2003 was decreased to 5.0, down from 6.0 in 2001 and 6.8 in 2000.

Goods producing industries as a whole had an incidence rate of 7.9 cases per 100 equivalent full-time workers. The goods producing industry sector with the highest incidence rate was manufacturing (NAICS 31-33) with an incidence rate of 8.4. Service providing industries as a whole had an incidence rate of 4.1 per 100 equivalent full-time workers. The service providing industry sector with the highest incidence rate was transportation and warehousing (NAICS 48-49) which had an incidence rate of 7.6.

The total number of nonfatal occupational illnesses in Missouri private industry in 2003 was reduced to 7,500 from 9,200 in 2002 and 11,900 in 2001. Most (4,300) of the occupational illnesses were in the manufacturing industry sector.

The most serious nonfatal occupational injury and illness cases involve lost work time. There were 22,770 nonfatal occupational injuries and illnesses involving days away from work in Missouri private industry in 2003. This was a 15.0 percent decrease from the 26,802 nonfatal occupational injuries and illnesses with days away from work in 2002.

There were 8,300 nonfatal occupational injuries and illnesses with days away from work in the goods-producing sectors. Manufacturing was the goods-producing major industry sector with the most injuries and illnesses at 4,700. There were 14,470 nonfatal occupational injuries and illnesses with days away from work in the service-providing sectors. Trade, transportation, and utilities was the service-providing major industry sector with the most injuries and illnesses at 7,220.

Women were the injured or ill worker in 31.9 percent of the nonfatal occupational injury and illness cases involving days away from work. Education and health services was the major industry sector in which women accounted for the largest percentage (82.9 percent) of the nonfatal occupational injury and illness cases.

Workers aged 35 to 44 years accounted for 26.7 percent of the total number of nonfatal occupational injury and illness cases with days away from work. Workers with one to five years of service had the most (35.0 percent) nonfatal occupational injuries and illnesses with days away from work. White only workers accounted for 59.3 percent of the nonfatal occupational injuries and illnesses with days away from work. Transportation and material moving occupations was the major occupational group with the highest number of nonfatal occupational injuries and illnesses with days away from work with 4,050.

Four characteristics are used to describe the event that caused an occupational injury or illness – nature of injury or illness, part of body affected, source of injury or illness, and event or exposure. Sprains, strains was the nature (physical characteristics) of injury or illness in 43.8 percent of the nonfatal occupational injuries and illnesses involving days away from work. Trunk was the part of body affected in 34.8 percent of all nonfatal occupational injury and illness cases involving days away from work. Worker motion or position was the source of injury or illness in 19.9 percent of all nonfatal occupational injuries and illnesses involving days away from work. Contact with objects and equipment was the event or exposure in 24.5 percent of the nonfatal occupational injury and illness cases involving days away from work.

New characteristics for 2003 injury and illness data involving days away from work are time of event, hours on the job before event occurred, and day of week. The time of event for most (30.0 percent) of the nonfatal occupational injuries and illnesses involving days away from work in private industry was 8:01 A.M. to 12:00 noon. The hours on the job before event occurred category with the most (21.7 percent) nonfatal occupational injuries and illnesses with days away from work in private industry was 2 hours to less than 4 hours. Tuesday was the day of the week when most (21.2 percent) of the nonfatal occupational injuries and illnesses involving days away from work occurred in private industry.

## Summary Data

Chart 1 presents a comparison of the incidence rates per 100 full-time workers for total nonfatal occupational injuries and illnesses by major industry sector between Missouri and All United States for private industry in 2003. Incidence rates represent the number of injuries and illnesses per 100 full-time workers. Incidence rates are compared between Missouri and All United States for private industry and major industry sectors. Missouri had the same incidence rate as All United States for private industry with an incidence rate of 5.0. Missouri had higher incidence rates than All United States for goods-producing sectors and each individual major industry sector, including natural resources and mining; construction; and manufacturing. All United States had a higher incidence rate for service-providing sectors and most individual major industry sectors, including information; financial activities; professional and business services; education and health services; and other services. Trade, transportation, utilities was the only service-providing major industry sector in which Missouri had a higher incidence rate than All United States.

The top industry subsectors (3-digit NAICS code) with the highest nonfatal occupational injury and illness incidence rates per 100 full-time employees for total cases in Missouri private industry in 2003 are shown in Chart 2. Transportation equipment manufacturing (NAICS 336) had the highest incidence rate at 14.6, indicating that there was a rate of 14.6 injuries and illnesses for each 100 full-time employees in that industry subsector. Couriers and messengers (NAICS 492) was the industry subsector with the second highest incidence rate in Missouri in 2003 at 13.2.

Chart 3 shows the percent distribution of nonfatal occupational illnesses by category of illness in Missouri private industry in 2003. The category of illness with the largest percentage of illnesses was all other occupational illnesses at 79%. The next largest category of illness was skin diseases or disorders accounting for 15% of the occupational illnesses in Missouri private industry in 2003.

The number of cases with days away from work, job transfer, or restriction, by case type and private major industry sectors in Missouri in 2003 is shown in Chart 4. Cases with days away from work are shown separately from cases with job transfer or restriction.

Incidence rates (per 100 full-time workers) of nonfatal occupational injuries and illnesses by selected industries and case types for Missouri private industry in 2003 are shown in Table 1. The incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as:  $(N/EH) \times 200,000$  where

N	= number of injuries and illnesses
EH	= total hours worked by all employees during the calendar year

200,000 = base for 100 equivalent full-time workers  
(working 40 hours per week, 50 weeks per year).

The incidence rates are presented for total recordable cases; cases with days away from work, job transfer, or restriction; and other recordable cases. Cases with days away from work, job transfer, or restriction are divided into total cases, cases with days away from work, and cases with job transfer or restriction. Days away from work cases include those that result in days away from work with or without job transfer or restriction.

Industries are listed as goods-producing and service-providing major industry sectors, and selected sectors and subsector industries identified by 2-digit and 3-digit NAICS codes, respectively. The incidence rate for private industry in Missouri for 2003 was 5.0 for total recordable cases of nonfatal occupational injuries and illnesses. This was reduced from incidence rates of 6.0 for total nonfatal occupational injury and illness cases in 2002, 6.1 in 2001, and 6.8 in 2000.

Goods-producing industry sectors had an incidence rate of 7.9 for total recordable cases. Manufacturing was the goods-producing major industry sector with the highest incidence rate at 8.4. Construction was the goods-producing major industry sector with the second highest incidence rate at 7.1. Manufacturing (NAICS 31-33) was the goods-producing sector with the highest incidence rate at 8.4. Construction (NAICS 23) was the goods-producing sector with the second highest incidence rate at 7.1. Transportation equipment manufacturing (NAICS 336) was the goods-producing subsector with the highest incidence rate at 14.6. Furniture and related product manufacturing (NAICS 337) was the goods-producing subsector with the second highest incidence rate at 12.0.

Service-providing industry sectors had an incidence rate of 4.1 total recordable cases. Trade, transportation, and utilities and education and health services were the service-providing major industry sectors with the highest incidence rate, both with a rate of 5.8. Transportation and warehousing (NAICS 48-49) was the service-providing sector with the highest incidence rate at 7.6. Arts, entertainment, and recreation (NAICS 71) was the service-providing sector with the second highest incidence rate at 5.5. The service-providing subsector with the highest incidence rate was couriers and messengers (NAICS 492) with an incidence rate of 13.2. The service-providing subsector with the second highest incidence rate was air transportation (NAICS 481) with an incidence rate of 12.7.

Table 2 presents the numbers of nonfatal occupational injuries and illnesses by selected industries and case types in Missouri private industry in 2003. The case and industry categories are the same as those described for Table 1. There were 94,900 total recordable cases of nonfatal occupational injuries and illnesses in Missouri in 2003. This was a 15.94 percent reduction

from the 112,900 total recordable cases of nonfatal occupational injuries and illnesses in Missouri private industry in 2002. This was a 19.85 percent reduction from the 118,400 total nonfatal occupational injuries and illnesses in Missouri private industry in 2001 and a 28.11 percent reduction from the 132,000 injury and illness cases reported in 2000.

There were 33,900 nonfatal occupational injuries and illnesses in the goods-producing sectors in Missouri private industry in 2003. Manufacturing was the goods-producing major industry sector and the goods-producing sector (NAICS 31-33) with the most nonfatal occupational injuries and illnesses with 24,700. Manufacturing accounted for 72.86 percent of the goods-producing and 26.03 percent of the total private industry injuries and illnesses. Construction was the goods-producing major industry sector and the goods-producing sector (NAICS 23) with the second highest number of injuries and illnesses with 8,600. Transportation equipment manufacturing (NAICS 336) was the goods-producing subsector with the most injuries and illnesses with 7,100 cases. Specialty trade contractors (NAICS 238) was the goods-producing subsector with the second highest number of injuries and illnesses with 5,300.

There were 61,000 nonfatal occupational injuries and illnesses in the service-providing sectors in Missouri private industry in 2003. Trade, transportation, and utilities was the service-providing major industry sector with the most nonfatal occupational injuries and illnesses with 27,000. Trade, transportation, and utilities accounted for 44.26 percent of the service-providing and 28.45 percent of the total private industry injuries and illnesses. Education and health services was the service-providing major industry sector with the second highest number of occupational injuries and illnesses with 15,800. Retail trade (NAICS 44-45) was the service-providing sector with the highest number of injuries and illnesses with 12,800 cases. Transportation and warehousing (NAICS 48-49) was the service-providing sector with the second highest number of injury and illness cases at 6,900 cases. General merchandise stores (NAICS 452) was the service-providing subsector with the most injuries and illnesses with 3,700. Merchant wholesalers, nondurable goods (NAICS 424) was the service-providing subsector with the second highest number of injuries and illnesses with 2,600.

The incidence rates of nonfatal occupational injuries and illnesses by sector and employment size of private industry in Missouri in 2003 are presented in Table 3. The categories for establishment employment size (number of workers) are 1 to 10; 11 to 49; 50 to 249; 250 to 999; and 1,000 or more. Private industry establishments with 1,000 or more workers had the highest incidence rate (7.0) of nonfatal occupational injuries and illnesses in 2003. Establishments with 1,000 or more workers had the highest incidence rates for goods-producing sectors. Establishments with 50 to 249 workers had the highest incidence rates for service-providing sectors.

Table 4 presents incidence rates and numbers of nonfatal occupational injuries by selected industries in Missouri private industry in 2003. Industries are listed as major industry sectors, and selected sector and subsector industries, identified by 2-digit and 3-digit NAICS codes, respectively. The incidence rate of nonfatal occupational injuries for Missouri private industry in 2003 was 4.6. This rate was reduced 16.36 percent from the 2002 rate of 5.5. The incidence rate of occupational injuries for goods-producing sectors was 6.9. The goods-producing major industry sector and sector with the highest incidence rate for occupational injuries was construction (NAICS 23) with a rate of 7.0. The goods-producing major industry sector and sector with the second highest incidence rate was manufacturing (NAICS 31-33) with a rate of 6.9. The selected goods-producing subsector industry with the highest incidence rate for nonfatal occupational injuries was furniture and related product manufacturing (NAICS 337) with a rate of 10.6. The selected goods-producing subsector industry with the second highest nonfatal occupational injury incidence rate in 2003 was transportation equipment manufacturing (NAICS 336) with a rate of 10.1. The incidence rate of nonfatal occupational injuries in the service-providing sectors was 3.9. The service-providing major industry sector with the highest incidence rate of occupational injuries was trade, transportation, and utilities with a rate of 5.5. Education and health services was the service-providing major industry sector with the second highest incidence rate at 5.4. The service-providing sector with the highest incidence rate of occupational injuries was transportation and warehousing (NAICS 48-49) with a rate of 6.6. Arts, entertainment, and recreation (NAICS 71) was the service-providing sector with the second highest incidence rate at 5.3. The selected service-providing subsector industry with the highest incidence rate of nonfatal occupational injuries in Missouri private industry in 2003 was couriers and messengers (NAICS 492) with a rate of 12.1. The selected service-providing subsector industry with the second highest incidence rate of nonfatal occupational injuries in Missouri in 2003 was air transportation (NAICS 481) with an incidence rate of 11.2.

Incidence rates and numbers of nonfatal occupational illnesses by major industry sector and category of illness for Missouri private industry in 2003 are shown in Table 5. These incidence rates represent the number of illnesses per 10,000 full-time workers and were calculated as:  $(N/EH) \times 20,000,000$  where

N = number of illnesses

EH = total hours worked by all employees during the calendar year

20,000,000 = base for 10,000 equivalent full-time workers

(working 40 hours per week, 50 weeks per year).

The incidence rate for total cases of nonfatal occupational illnesses in Missouri private industry in 2003 was 39.4. This was a 19.92 percent reduction from the 2002 rate of 49.2 for total cases of nonfatal occupational illnesses. The incidence rate for goods-producing industries was 105.1. Manufacturing was the goods-producing major industry sector with the highest incidence rate of nonfatal occupational illnesses at 145.2. The incidence rate for service-providing

industries was 20.4. Trade, transportation, and utilities was the service-providing major industry sector with the highest incidence rate of nonfatal occupational illnesses at 32.1. The number of total cases of nonfatal occupational illnesses in Missouri private industry in 2003 was reduced to 7,500. This was an 18.48 percent reduction down from 9,200 in 2002 and a 36.97 percent reduction from 11,900 total illness cases in 2001.

Table 6 shows the incidence rates of nonfatal occupational injuries and illnesses by industry and case types in Missouri private industry in 2003. Cases are presented as total recordable cases; cases with days away from work, job transfer, or restriction; and other recordable cases as described for Table 1. The industries are separated into goods-producing or service-providing and are listed as major industry sectors, sectors (2-digit NAICS code), subsectors (3-digit NAICS code), industry groups (4-digit NAICS code), NAICS industries (5-digit NAICS code), and U.S. industries (6-digit NAICS code). Framing contractors (NAICS 23813) was the goods-producing NAICS industry with the highest incidence rate of total recordable nonfatal occupational injuries and illnesses in Missouri private industry in 2003 with a rate of 17.3. Tile and terrazzo contractors (NAICS 23834) was the goods-producing NAICS industry with the second highest incidence rate at 16.7. Couriers and messengers (NAICS 492) was the service providing industry subsector with the highest incidence rate of nonfatal occupational injuries and illnesses in Missouri private industry in 2003 with a rate of 13.2. Air transportation (NAICS 481) was the service-providing industry subsector with the second highest incidence rate at 12.7.

The numbers of nonfatal occupational injuries and illnesses by industry and case types for Missouri private industry in 2003 are shown in Table 7. Cases are presented as total recordable cases; cases with days away from work, job transfer, or restriction; and other recordable cases, as described for Table 1. The industries are separated into goods-producing or service-providing and are listed as major industry sectors, sectors (2-digit NAICS code), subsectors (3-digit NAICS code), industry groups (4-digit NAICS code), NAICS industries (5-digit NAICS code), and U.S. industries (6-digit NAICS code).

Table 8 presents the incidence rates of nonfatal occupational illnesses by selected industries and category of illness for Missouri private industry in 2003. The categories of illnesses are: total cases; skin disorders; respiratory conditions; poisonings; and all other illnesses. Private industry had incidence rates of 39.4 for total cases, 5.7 for skin disorders, 2.2 for respiratory conditions, 0.6 for poisonings, and 30.9 for all other illnesses. Goods-producing sectors had incidence rates of 105.1 for total cases, 7.1 for skin disorders, 3.4 for respiratory conditions, 0.7 for poisonings, and 93.9 for all other illnesses. The goods-producing subsector with the highest incidence rate for total cases was transportation equipment manufacturing (NAICS 336) with a rate of 453.3. Transportation equipment manufacturing was also the goods-producing subsector industry with the highest incidence rate for skin disorders at 19.3.

Food manufacturing (NAICS 311) was the goods-producing subsector industry with the highest incidence rate for respiratory conditions at 12.2. All subsector goods-producing industries had fewer than 15 poisoning cases. Transportation equipment manufacturing was the goods-producing subsector industry with the highest incidence rate for all other illnesses with an incidence rate of 424.2. Service-providing sectors had incidence rates of 20.4 for total cases, 1.8 for respiratory conditions, 0.6 for poisonings, and 12.8 for all other illnesses. Data was not available for skin disorders. Air transportation (NAICS 481) was the service-providing subsector industry with the highest incidence rate for total cases of nonfatal occupational illnesses at 142.9. Gasoline stations (NAICS 447) was the service-providing subsector industry with the highest incidence rate for skin disorders at 19.7. Social assistance (NAICS 624) was the service-providing subsector industry with the highest incidence rate for respiratory conditions at 24.7. Gasoline stations was the service-providing subsector industry with the highest incidence rate for poisonings at 19.7. Air transportation was the service-providing subsector industry with the highest incidence rate for all other illnesses at 142.9.

The numbers of nonfatal occupational illnesses by selected industries and category of illness in Missouri private industry in 2003 are presented in Table 9. The categories of illnesses are the same as those listed for Table 8. There were 7,500 nonfatal occupational illness cases in Missouri private industry in 2003. Most, 5,900 or 78.67 percent, of these cases were in the all other illnesses category. There were 4,500 total illness cases in the goods-producing sectors. Manufacturing was the goods-producing major industry sector and sector with the most total illness cases with 4,300. There were 3,000 total illness cases in the service-providing sectors. Trade, transportation, and utilities was the service-providing major industry sector with the most total illness cases with 1,500. Transportation and warehousing (NAICS 48-49) was the sector with the highest number of total cases of occupational illnesses with 900.

The incidence rates and numbers of nonfatal occupational injuries by industry in Missouri private industry in 2003 are presented in Table 10. The goods-producing industry with the highest incidence rate in 2003 was framing contractors (NAICS 23813) with an incidence rate of 17.3. The goods-producing industry with the second highest incidence rate was tile and terrazzo contractors (NAICS 23834) with an incidence rate of 16.7. The service-providing industry with the highest incidence rate of occupational injuries was couriers and messengers (NAICS 492) with a rate of 12.1. The service-providing industry with the second highest incidence rate was air transportation (NAICS 481) with an incidence rate of 11.2.

**Table 1. Incidence rates<sup>1</sup> of nonfatal occupational injuries and illnesses by selected industries and case types, 2003 -- Continued**

**Missouri**

Industry <sup>2</sup>	NAICS code <sup>3</sup>	2003 Average annual employment <sup>4</sup> (000's)	Total recordable cases	Cases with days away from work, job transfer, or restriction			Other recordable cases
				Total	Cases with days away from work <sup>5</sup>	Cases with job transfer or restriction	
Repair and maintenance . . . . .	811	24.5	4.2	1.9	1.5	0.5	2.2
Personal and laundry services . . . . .	812	26.9	2.9	1.6	0.6	1.0	1.3
Religious, grantmaking, civic, professional, and similar organizations . . . . .	813	22.8	2.5	1.0	0.6	0.5	1.5

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) x 200,000 where

N = number of injuries and illnesses  
 EH = total hours worked by all employees during the calendar year  
 200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual, 2002 Edition

<sup>4</sup> Employment is expressed as an annual average and is derived primarily from the BLS-State Quarterly Census of Employment and Wages.

<sup>5</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>6</sup> Excludes farms with fewer than 11 employees.

<sup>7</sup> Data for mining (Sector 21 in the North American Industry Classification System -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from

the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>8</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>9</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>10</sup> Incidence rate less than 0.05.

<sup>11</sup> Fewer than 15 cases.

NOTE: Because of rounding, components may not add to totals.

-- Indicates data not available.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

**Table 4. Incidence rates<sup>1</sup> and numbers of nonfatal occupational injuries by selected industries, 2003 -- Continued**

**Missouri**

Industry <sup>2</sup>	NAICS code <sup>3</sup>	2003 Average annual employment <sup>4</sup> (000's)	Incidence rates	Numbers (000's)
Repair and maintenance .....	811	24.5	4.1	0.9
Personal and laundry services .....	812	26.9	2.9	0.6
Religious, grantmaking, civic, professional, and similar organizations .....	813	22.8	2.3	0.3

<sup>1</sup> Incidence rates represent the number of injuries per 100 full-time workers and were calculated as: (N/EH) x 200,000 where

N = number of injuries  
EH = total hours worked by all employees during the calendar year  
200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual, 2002 Edition

<sup>4</sup> Employment is expressed as an annual average and is derived primarily from the BLS-State Quarterly Census of Employment and Wages.

<sup>5</sup> Excludes farms with fewer than 11 employees.

<sup>6</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and

nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>8</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>9</sup> Fewer than 50 cases.

<sup>10</sup> Fewer than 15 cases.

-- Indicates data not available.

<sup>1</sup> Incidence rates represent the number of illnesses per 10,000 full-time workers and were calculated as:

(N/EH) x 20,000,000 where:

N = number of illnesses

EH = total hours worked by all employees during the calendar year

20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> *North American Industry Classification System* Manual, 2002 Edition

<sup>3</sup> Excludes farms with fewer than 11 employees.

<sup>4</sup> Data for mining (Sector 21 in the North American Industry Classification System Manual, 2002 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes OSHA made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are

not comparable to estimates in other industries.

<sup>5</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes OSHA made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these are not comparable to estimates in other industries.

<sup>6</sup> Fewer than 50 cases.

<sup>7</sup> Fewer than 15 cases.

NOTE: Because of rounding, components may not add to totals.

Commercial and industrial machinery and equipment (except automotive and electronic) repair and maintenance . . . . .	8113	2.3	1.0	( <sup>11</sup> )	( <sup>11</sup> )	( <sup>11</sup> )	( <sup>11</sup> )
Personal and laundry services . . . . .	812	26.9	2.9	1.6	0.6	1.0	1.3
Religious, grantmaking, civic, professional, and similar organizations . . . . .	813	22.8	2.5	1.0	0.6	0.5	1.5

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) x 200,000 where

N = number of injuries and illnesses  
EH = total hours worked by all employees during the calendar year  
200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual, 2002 Edition

<sup>4</sup> Employment is expressed as an annual average and is derived primarily from the BLS-State Quarterly Census of Employment and Wages.

<sup>5</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>6</sup> Excludes farms with fewer than 11 employees.

<sup>7</sup> Data for mining (Sector 21 in the North American Industry Classification System -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from

the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>8</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>9</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>10</sup> Incidence rate less than 0.05.

<sup>11</sup> Fewer than 15 cases.

NOTE: Because of rounding, components may not add to totals.

-- Indicates data not available.

See footnotes at end of table.

**Table 8. Incidence rates<sup>1</sup> of nonfatal occupational illnesses by selected industries and category of illness, 2003 -- Continued**

**Missouri**

Industry <sup>2</sup>	NAICS code <sup>3</sup>	Incidence rates per 10,000 full-time workers <sup>1</sup>				
		Total cases	Skin disorders	Respiratory conditions	Poisonings	All other illnesses
Repair and maintenance . . . . .	811	8.6	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )
Personal and laundry services . . . . .	812	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )
Religious, grantmaking, civic, professional, and similar organizations . . . . .	813	19.6	( <sup>9</sup> )	( <sup>9</sup> )	( <sup>9</sup> )	16.9

<sup>1</sup> Incidence rates represent the number of illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

N = number of illnesses  
 EH = total hours worked by all employees during the calendar year  
 20,000,000 = base for 10,000 equivalent full-time workers  
 (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Incidence rate less than 0.05.

<sup>6</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational

Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>8</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>9</sup> Fewer than 15 cases.

NOTE: Because of rounding, components may not add to totals.

-- Indicates data not available.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>2</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>3</sup> Excludes farms with fewer than 11 employees.

<sup>4</sup> Fewer than 50 cases.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its

recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>8</sup> Fewer than 15 cases.

NOTE: Because of rounding, components may not add to totals.

-- Indicates data not available.

<sup>1</sup> Incidence rates represent the number of injuries per 100 full-time workers and were calculated as: (N/EH) x 200,000 where

N = number of injuries  
EH = total hours worked by all employees during the calendar year  
200,000 = base for 100 equivalent full-time workers  
(working 40 hours per week, 50 weeks per year).

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual, 2002 Edition

<sup>4</sup> Employment is expressed as an annual average and is derived primarily from the BLS-State Quarterly Census of Employment and Wages.

<sup>5</sup> Excludes farms with fewer than 11 employees.

<sup>6</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries

are not comparable to estimates in other industries.

<sup>7</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>8</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>9</sup> Fewer than 50 cases.

<sup>10</sup> Percent relative standard error less than 0.5.

<sup>11</sup> Relative standard errors were not calculated for coal and lignite mining (NAICS 2121), metal, and nonmetal mining (NAICS 2122 and 2123), and rail transportation (NAICS 482).

<sup>12</sup> Fewer than 15 cases.

<sup>13</sup> Incidence rate less than 0.05.

NOTE: Because of rounding, components may not add to totals

# **Case and Demographic Data**

The most serious nonfatal occupational injury and illness cases involve lost worktime. There were 22,770 nonfatal occupational injuries and illnesses involving days away from work in Missouri private industry in 2003. This was a 15.0 percent decrease from the 26,802 cases in 2002. One measure of the severity of lost worktime cases is the percent distribution. A second measure of the severity of lost worktime cases is the median number of lost workdays. The median days away from work designates the point at which half the cases involved more days and half the cases involved fewer days. The median days away from work due to nonfatal occupational injuries and illnesses in Missouri private industry were eight days in 2003.

Demographic information provides details of characteristics of the injured or ill worker. This information includes occupation, gender, age of worker, occupational group, length of service with employer at the time of the incident, and race or ethnic origin. Four case characteristics are used to describe each nonfatal occupational injury or illness. The nature of the injury or illness identifies the principal characteristics, or physical effects, of the injury or illness. The part of body affected is identified for the involved worker. The source of injury or illness identifies the object, substance, bodily motion, or exposure that directly produced or inflicted the injury or illness. The event or exposure describes the manner in which the injury or illness was produced or inflicted by the source of the injury or illness.

Chart 1 shows the percent distribution of occupational injuries and illnesses involving days away from work by event or exposure in Missouri private industry in 2003. The two major events or exposures were contact with object, equipment accounting for 24.5 percent of the nonfatal occupational injuries and illnesses with days away from work and overexertion accounting for 23.3 percent.

The percent distribution of occupational injuries and illnesses involving days away from work by source of injury or illness in Missouri private industry in 2003 is presented in Chart 2. Three sources accounted for 58.9 percent of the cases: worker motion or position accounted for 19.9 percent of the nonfatal occupational injuries and illnesses involving days away from work; floor, ground surfaces accounted for 19.8 percent; and other accounted for 19.2 percent.

Chart 3 presents the percent distribution of occupational injuries and illnesses involving days away from work by part of body affected in Missouri private industry in 2003. The part of body most affected was trunk, accounting for 34.8 percent of the occupational injuries and illnesses with days away from work. Upper extremities was the second most affected part of body, accounting for 27.0 percent of the nonfatal occupational injuries and illnesses. Lower extremities accounted for 20.6 percent of the nonfatal occupational injuries and illnesses.

The percent distribution of occupational injuries and illnesses involving days away from work by nature of injury or illness in Missouri private industry in 2003 is shown in Chart 4. The primary nature of injury or illness was sprains, strains, which was the nature in 43.9 percent of the nonfatal occupational injuries and illnesses involving days away from work. Other was the second most frequent nature, accounting for 14.9 percent of the nonfatal occupational injuries and illnesses involving days away from work.

Chart 5 shows the occupations with the most injuries and illnesses with days away from work in Missouri private industry in 2003. The occupation with the most injuries and illnesses with days away from work in 2003 was laborers and freight, stock, and material movers, hand with 1,540 injuries and illnesses with days away from work. The occupation with the second most injuries and illnesses involving days away from work was truck drivers, heavy and tractor-trailer with 1,210 injury and illness cases.

Occupations with the highest median days away from work in Missouri private industry in 2003 are presented in Chart 6. First-line supervisors/managers of transportation and material-moving machine and vehicle operators had the highest median days away from work at 41 days. Electricians; reservation and transportation ticket agents and travel clerks; and molding, coremaking, and casting machine setters, operators, and tenders, metal and plastic were tied for the next highest median days away from work at 30 days each.

Median days away from work due to nonfatal occupational injury or illness by event or exposure in Missouri private industry in 2003 are presented in Chart 7. The event or exposure with the most median days away from work was fall to lower level with 25 median days away from work. The events or exposures tied for the second highest median days away from work were repetitive motion and slips, trips, loss of balance – without fall with 14 days each.

Chart 8 presents the median days away from work due to nonfatal occupational injury or illness by source of injury or illness in Missouri private industry in 2003. Worker motion or position was the source with the highest number of median days away from work at 13 days. Vehicles was the source with the next highest number of median days away from work in 2003 with 10 days.

Chart 9 shows the median days away from work due to nonfatal occupational injury or illness by part of body affected in Missouri private industry in 2003. The part of body with the highest number of median days away from work was shoulder with 23 median days away from work. Toe and knee were the parts of body tied for the second highest number of median days away from work at 14 days each.

Median days away from work due to nonfatal occupational injury or illness by nature of injury or illness in Missouri private industry in 2003 are shown in Chart 10. The nature of injury or illness with the highest number of median days away from work was fractures with 25 days. Carpal tunnel syndrome was the nature with the second highest number of median days away from work due to nonfatal occupational injury or illness in 2003 with 14 days.

Chart 11 presents the median days away from work due to nonfatal occupational injury or illness by age of worker in Missouri private industry in 2003. Workers aged 65 and over had the highest number of median days away from work at 16 days. The age categories 55 to 64, 45 to 54, and 35 to 44 were tied for the second highest number of median days away from work in 2003 with 10 days each.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by length of service in Missouri private industry in 2003 are presented in Chart 12. The highest distribution of nonfatal occupational injuries and illnesses involving days away from work is in the length of service category of 1 to 5 years at 35.0 percent. The next highest category is more than 5 years of service accounting for 32.2 percent of the nonfatal occupational injuries and illnesses.

Chart 13 presents the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by age of worker in Missouri private industry in 2003. The age category with the highest distribution of nonfatal occupational injuries and illnesses with days away from work was 35 to 44 years with 26.7 percent. The age category with the second highest percent distribution of nonfatal occupational injuries and illnesses was 25 to 34 years with 22.8 percent. The age category with the third highest percent distribution of nonfatal occupational injuries and illnesses was 45 to 54 years with 21.9 percent. If these three categories are combined, workers aged 25 to 54 years accounted for 71.4 percent of the occupational injuries and illnesses involving days away from work in Missouri private industry in 2003.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by major occupational group in Missouri private industry in 2003 are shown in Chart 14. Transportation and material moving occupations was the occupational group with the highest distribution of the nonfatal occupational injuries and illnesses involving days away from work at 17.8 percent. Service occupations was the occupational group with the second highest distribution at 16.8 percent.

The case and demographic statistical data separates the private industries into goods-producing and service-providing. The goods-producing major industry sectors are: natural resources and mining; construction; and manufacturing. The service-providing major industry sectors are: trade, transportation and utilities;

information; financial activities; professional and business services; education and health services; leisure and hospitality; and other services.

Table 1 presents the number of nonfatal occupational injuries and illnesses involving days away from work by selected worker characteristics and major industry sector in 2003 for Missouri private industry. The worker characteristics presented are: sex; age; length of service with employer; and race or ethnic origin. There were 22,770 nonfatal occupational injuries and illnesses involving days away from work in Missouri private industry in 2003. This number was a 15.0 percent decrease from the 26,802 nonfatal occupational injuries and illnesses involving days away from work in 2002. The data is separated into goods-producing and service-providing sectors. There were 8,300 nonfatal occupational injuries and illnesses in the total goods-producing sector. This accounted for 36.5 percent of all the nonfatal injuries and illnesses in private industry. Manufacturing was the goods-producing major industry sector with the most nonfatal occupational injuries and illnesses with 4,700. There were 14,470 nonfatal occupational injuries and illnesses in the total service-providing sector. This accounted for 63.5 percent of all the nonfatal injuries and illnesses in private industry. Trade, transportation, and utilities was the service-providing major industry sector with the most nonfatal occupational injuries and illnesses with 7,220.

The age group with the largest number of nonfatal occupational injuries and illnesses involving days away from work was workers aged 35 to 44 years for Missouri private industry. The 6,070 cases were decreased 27.0 percent from 2002. The age group 35 to 44 years also had the most nonfatal occupational injuries and illnesses for the total goods-producing sector and the total service-providing sector. The length of service with employer category with the most nonfatal occupational injuries and illnesses with days away from work was 1 to 5 years for private industry. The 7,970 cases in that category in 2003 were a 19.8 percent decrease from 2002. The length of service with employer category with the most nonfatal occupational injuries and illnesses for the total goods-producing sector was more than 5 years and the category for the total service-providing sector was 1 to 5 years. White only was the race or ethnic origin category with the most injuries and illnesses accounting for 59.3 percent of the total cases. The 13,510 injuries and illnesses for White only workers in 2003 was a 23.3 percent decrease from White, non-Hispanic cases in 2002. White only was also the race or ethnic origin with the most nonfatal occupational injuries and illnesses for both the total goods-producing sector and the total service-providing sector.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by selected worker characteristics and industry sector in 2003 for Missouri private industry are shown in Table 2. The worker characteristics are the same as the ones listed for Table 1. In 2003, men had 67.8 percent of the nonfatal occupational injuries and illnesses involving days

away from work in Missouri private industry. Men accounted for 81.9 percent of the nonfatal occupational injuries and illnesses in the total goods-producing sector and 59.6 percent in the total service-providing sector. The age group 35 to 44 years had the highest distribution at 26.7 percent for private industry. The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by age of worker in Missouri private industry in 2003 are shown in Chart 13. The age group 35 to 44 years also had the highest distribution at 31.9 percent for the total goods-producing sector and at 23.6 percent for the total service-providing sector. The length of service with employer category 1 to 5 years had the highest distribution at 35.0 percent for private industry. The percent distributions by length of service are shown in Chart 12. More than 5 years was the length of service with employer with the highest distribution for the total goods-producing sector at 35.9 percent. The category of length of service with the highest distribution for the total service-providing sector was 1 to 5 years at 35.7 percent. White only was the race or ethnic origin with the highest percent distributions for private industry (59.3 percent), the total goods-producing sector (71.7 percent), and the total service-providing sector (52.2 percent).

Table 3 shows the number of nonfatal occupational injuries and illnesses involving days away from work by major occupational group and major industry sector in Missouri private industry in 2003. The major occupational group with the most nonfatal occupational injuries and illnesses involving days away from work was transportation and material moving occupations. Transportation and material moving occupations had 4,050 (17.8 percent) of the total 22,770 nonfatal occupational injury and illness cases in 2003. The percent distributions by major occupational group are shown in Chart 14. The major occupational group with the second most injuries and illnesses was construction and extraction occupations with 3,620 nonfatal occupational injuries and illnesses involving days away from work. The major occupational group with the most nonfatal occupational injuries and illnesses in the total goods-producing sector was construction and extraction occupations with 3,370 cases. Transportation and material moving occupations had the most nonfatal occupational injuries and illnesses in the total service-providing sector with 3,050.

Table 4 shows the number of nonfatal occupational injuries and illnesses involving days away from work by selected worker occupations and major industry sector in Missouri private industry in 2003. The selected occupation with the most injuries and illnesses in private industry was laborers and freight, stock, and material movers, hand with 1,540 cases. The selected occupation with the second most injuries and illnesses in private industry were truck drivers, heavy and tractor-trailer with 1,210 cases. Chart 5 shows the occupations with the most injuries and illnesses with days away from work in Missouri private industry in 2003. Carpenters was the selected occupation with the most nonfatal occupational injuries and illnesses involving days away from work in 2003 in the total goods-producing sector with 1,180 cases. Laborers and freight, stock, and

material movers, hand was the selected occupation with the most cases in the total service-providing sector in 2003 with 1,080 cases.

The number of nonfatal occupational injuries and illnesses involving days away from work by selected injury or illness characteristics and major industry sector in 2003 for Missouri private industry are presented in Table 5. The characteristics reported are: nature of injury, illness; part of body affected; source of injury, illness; and event or exposure. Numbers for these characteristics are presented for private industry and each goods-producing and service-providing major industry sector.

Sprains, strains was the nature of injury, illness with the most nonfatal occupational injuries and illnesses involving days away from work in Missouri private industry, the total goods-producing sector, and the total service-providing sector in 2003. Trunk was the part of body affected in most of the injuries and illnesses in 2003 for private industry, the total goods-producing sector, and the total service-providing sector. The source of injury, illness with the highest number of injuries and illnesses in 2003 was worker motion or position for private industry and the total goods-producing sector. Floors, walkways, ground surfaces was the source of injury, illness with the highest number of injuries and illnesses in 2003 for the total service-providing sector. Contact with objects and equipment was the event or exposure leading to the most injuries and illnesses for private industry and the total goods-producing sector in 2003. Overexertion was the event or exposure leading to the most injuries and illnesses for the total service-providing sector in 2003.

Table 6 presents the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by selected injury or illness characteristics and major industry sector in Missouri private industry in 2003. The characteristics are the same as those for Table 5. The percent distributions are shown for private industry and for each goods-producing and service-providing major industry sectors. Sprains, strains was the nature of injury, illness category with the highest percentage of nonfatal occupational injuries and illnesses involving days away from work for private industry, the total goods-producing sector, and the total service-providing sector. The percent distribution by nature of injury or illness is shown in Chart 4 for Missouri private industry in 2003. Trunk was the part of body affected with the highest percentage of nonfatal occupational injuries and illnesses involving days away from work for private industry, the total goods-producing sector, and the total service-providing sector in 2003. The percent distribution by part of body affected for Missouri private industry in 2003 is shown in Chart 3. Worker motion or position was the major source of injury, illness in private industry and the total goods-producing sector in 2003. Floors, walkways, ground surfaces was the major source of injury, illness in the total service-providing sector. The percent distribution by source of injury or illness for private industry in Missouri in 2003 is shown in Chart 2. Contact with objects and equipment was the major event or exposure in

private industry and the total goods-producing sector in 2003. Overexertion was the event or exposure with the highest percent distribution in the total service-providing sector. The percent distribution by event or exposure is shown in Chart 1 for Missouri private industry in 2003.

The incidence rates for nonfatal occupational injuries and illnesses involving days away from work per 10,000 full-time workers for selected characteristics and major industry sector are shown in Table 7 for Missouri private industry in 2003. The characteristics are the same as those described for Table 5. Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as:  $(N/EH) \times 20,000,000$  where

N	= number of injuries and illnesses
EH	= total hours worked by all employees during calendar year
20,000,000	= base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

The incidence rate for nonfatal occupational injuries and illnesses involving days away from work for Missouri private industry in 2003 was 119.3 per 10,000 full-time workers. This was a 16.5 percent decrease from the incidence rate of 142.8 in 2002. The incidence rate for the total goods-producing sector was 194.6. Construction was the goods-producing major industry sector with the highest incidence rate at 285.3. The incidence rate for the total service-providing sector was 97.7. Trade, transportation, and utilities was the service-providing major industry sector with the highest incidence rate at 154.6.

Sprains, strains was the nature of injury, illness with the largest incidence rate for Missouri private industry in 2003 at 52.3. This rate was decreased 22.2 percent from the 2002 rate of 67.2. Sprains, strains was also the nature of injury, illness with the highest incidence rates for the total goods-producing sector and the total service-providing sector in 2003. Trunk was the part of body affected with the largest incidence rate at 41.6 for Missouri private industry in 2003. This rate was reduced 13.0 percent from the 2002 rate of 47.8. Trunk was also the part of body affected with the highest incidence rates for the total goods-producing sector and the total service-providing sector in 2003. The source of injury, illness with the highest incidence rate in Missouri private industry in 2003 was worker motion or position at 23.8. This was a slight increase from the 2002 rate of 23.3. Worker motion or position was the source of injury, illness with the highest incidence rate for the total goods-producing sector in 2003. Floors, walkways, ground surfaces was the source of injury, illness with the highest incidence rate for the total service-providing sector in 2003. Contact with objects and equipment was the event or exposure with the highest incidence rate at 29.2 for Missouri private industry in 2003. This was a 12.3 percent reduction from the 2002 rate of 33.3. Contact with objects and equipment was the event or exposure with the highest incidence rate for the total goods-producing sector in 2003. Overexertion was the event or exposure with the highest incidence rate for the total service-providing sector in 2003.

Table 8 shows the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by selected worker characteristics and number of days away from work in 2003 in Missouri private industry. The characteristics are the same as those described for Table 1. The category 31 days or more had the highest percent distribution (25.2 percent) of the total nonfatal occupational injuries and illnesses involving days away from work. The median days away from work are also listed for each characteristic. The median days away from work for Missouri private industry in 2003 were eight days. The median days away from work for men workers were eight days and for women workers were seven days. The age group with the most median days away from work were workers aged 65 and over with 16 median days away from work. This was a reduction from 33 median days away from work in 2002. The median days away from work by age of worker is shown in Chart 11. More than 5 years was the length of service with employer category with the most median days away from work in 2003 at 10 days, reduced from 12 days in 2002. White only was the race or ethnic origin category with the highest number of median days away from work in 2003 with nine.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by major occupational group and number of days away from work for Missouri private industry in 2003 are shown in Table 9. Median days away from work are also listed for each major occupational group. Architecture and engineering occupations was the major occupational group with the most median days away from work at 18 days. The largest percent (45.5) of cases in this occupational group had 31 days or more away from work. Construction and extraction occupations had the second highest median days away from work at 14 days.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by selected occupations and number of days away from work in Missouri private industry in 2003 are presented in Table 10. Electricians, and reservation and transportation ticket agents and travel clerks were tied with the highest number of median days away from work at 30 days. Maintenance and repair workers, general had the next highest number of median days away from work at 23 days.

Table 11 presents the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by selected injury or illness characteristics and number of days away from work for Missouri private industry in 2003. The characteristics are the same as those described for Table 5. Median days away from work are also listed for each selected injury or illness characteristic. The nature of injury, illness with the most median days away from work was fractures at 25 days. (This is shown in Chart 10.) Fractures had the second highest median days away from work in 2002 at 23 days. There was an 8.70 percent increase in the number of median days away from work in 2003

over 2002. Carpal tunnel syndrome was the nature with the second highest median days away from work in 2003 with 14 days. The part of body affected with the most median days away from work was shoulder at 23 days. (This is plotted in Chart 9.) This was a 27.8 percent increase from the 18 days in 2002. Knee and toe tied for the second highest median days away from work at 14 days. Worker motion or position was the source of injury, illness with the most median days away from work in 2003 at 13 days. This was a slight decrease from the 14 days in 2002. (This is shown in Chart 8.) Vehicles was the source of injury, illness with the next highest median days away from work in 2003 at 10 days. Fall to lower level was the event or exposure with the most median days away from work in 2003 with 25 days. (This is plotted in Chart 7.) The median days away from work for fall to lower level was increased 31.6 percent from 19 days in 2002. Slips, trips, loss of balance – without fall and repetitive motion tied for the event or exposure with the second highest median days away from work in 2003 at 14 days.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by major industry sector and number of days away from work in Missouri private industry in 2003 are presented in Table 12. The median days away from work are listed for private industry and each major industry sector. Private industry had eight median days away from work. Total goods-producing sectors had 11 median days away from work. Construction was the goods-producing major industry sector with the most median days away from work with 13 days. Total service-providing sectors had seven median days away from work. Information was the service-providing major industry sector with the highest number of median days away from work with 16 days.

Table 13 shows the number of nonfatal occupational injuries and illnesses involving days away from work by time, hours on the job, and weekday and major industry sector for Missouri private industry in 2003. The time of event with the most nonfatal occupational injuries and illnesses involving days away from work for private industry, the total goods-producing sector, and the total service-providing sector was 8:01 A.M. to 12:00 noon. The hours on the job before event occurred category with the most injuries and illnesses for private industry and the total service-providing sector was 2 hours to less than 4 hours. The total goods-producing sector actually had more cases where the hours on the job before event occurred category was not reported, but where it was reported, the highest category was 2 hours to less than 4 hours. The day of week with the most nonfatal occupational injuries and illnesses for private industry and the total service-providing sector was Tuesday. Thursday was the day with the most injuries and illnesses for the total goods-producing sector.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by time, hours on the job, and weekday and major industry sector for Missouri private industry in 2003 are shown in Table 14. The time of event category 8:01 A.M. to 12:00 noon accounted for 30.0 percent of

private industry cases, 31.3 percent of total goods-producing cases, and 29.2 percent of total service-providing cases. The hours on the job before event occurred category that accounted for 21.7 of the private industry cases and 23.4 percent of the total service-providing cases was 2 hours to less than 4 hours. There were 20.5 percent of the cases in the total goods-producing sector where hours on the job before event occurred were not reported. The hours on the job before event occurred category with reported hours with the most injuries and illnesses for total goods-producing sectors was 2 hours to less than 4 hours with 18.7 percent of the cases. Tuesday accounted for 21.2 percent of the occupational injury and illness cases for both private industry and total service-providing sectors. Thursday accounted for 21.6 percent of the cases for total goods-producing sectors.

Table 15 shows the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by time, hours on the job, and weekday and number of days away from work in Missouri private industry in 2003. The time of event with the highest number of median days away from work was 8:01 A.M. to 12:00 noon with 12 days. The hours on the job before event occurred category with the most median days away from work was before shift began with 20 days. The category with the second highest number of median days away from work was 10 hours to less than 12 hours with 13 days. Thursday was the day of week with the highest number of median days away from work with 12 days.

Table 16 shows the number of nonfatal occupational injuries and illnesses involving days away from work by industry, sex, and age of worker in Missouri private industry in 2003. The numbers of nonfatal occupational injuries and illnesses involving days away from work are listed by sex and age of worker for major industry sectors, industry sectors, and industries classified by NAICS codes. The age of worker category with the most injuries and illnesses was 35 to 44 years for private industry, the total goods-producing sector, and the total service-providing sector. Specialty trade contractors (NAICS 238) was the goods-producing industry with the most nonfatal occupational injuries and illnesses with 2,060. Most of those cases, 2,040, involved men workers. Transportation equipment manufacturing (NAICS 336) was the goods-producing industry with the second most injuries and illnesses with 950. Most of those cases, 700, involved men workers. Merchant wholesalers, nondurable goods (NAICS 424) was the service-providing industry with the most nonfatal occupational injuries and illnesses with 820. Most, 610, of those cases involved men workers. General merchandise stores (NAICS 452) was the service-providing industry with the second most nonfatal occupational injuries and illnesses with 660. These cases involved 350 women workers and 310 men workers.

The number of nonfatal occupational injuries and illnesses involving days away from work by industry and race or ethnic origin of worker in Missouri private

industry in 2003 are presented in Table 17. The numbers of nonfatal occupational injuries and illnesses involving days away from work are listed by race or ethnic origin for major industry sectors, industry sectors, and industries classified by NAICS codes. The race or ethnic origin was not reported in 29.2 percent of cases. White only was the race or ethnic origin with the most nonfatal occupational injuries and illnesses in all sectors and industries except for the industries that had not reported as the highest number.

Table 18 presents the number of nonfatal occupational injuries and illnesses involving days away from work by industry and length of service with employer in Missouri private industry in 2003. The numbers of nonfatal occupational injuries and illnesses with days away from work are listed by length of service with employer for major industry sector, industry sectors, and industries classified by NAICS codes. The length of service with employer category with the most injuries and illnesses was 1 to 5 years for private industry and the total service-providing sector. The length of service with employer category with the second most injuries and illnesses in private industry and the total service-providing sector was more than 5 years. More than 5 years was the length of service with employer category with the most injuries and illnesses in the total goods-producing sector and 1 to 5 years was the category with the second highest number of injuries and illnesses.

Table 19 shows the number of nonfatal occupational injuries and illnesses involving days away from work by occupation and major industry sector for Missouri private industry in 2003. The number of nonfatal occupational injuries and illnesses involving days away from work for each occupation are listed for each goods-producing major industry sector and service-providing major industry sector. There are 23 major groups of occupations. Transportation and material moving occupations was the major occupation group with the most nonfatal occupational injuries and illnesses for private industry and the total service-providing sector. Construction and extraction occupations was the major occupation group with the most nonfatal occupational injuries and illnesses for the total goods-producing sector. Construction and extraction occupations had the second most injuries and illnesses in private industry. Office and administrative support occupations was the major occupation group with the second highest number of injuries and illnesses for the total service-providing sector. Production occupations was the major occupation group with the second highest number of injuries and illnesses for the total goods-producing sector.

The number of nonfatal occupational injuries and illnesses involving days away from work by nature of injury or illness and major industry sector in Missouri private industry in 2003 are shown in Table 20. The numbers of nonfatal occupational injuries and illnesses with days away from work for each nature are listed for each goods-producing major industry sector and service-providing major industry sector. The major categories of natures are: traumatic injuries and disorders; systemic diseases and disorders; infectious and parasitic

diseases; and symptoms, signs, and ill-defined conditions. Traumatic injuries and disorders accounted for 20,120 (88.4 percent) of the 22,770 total nonfatal occupational injuries and illnesses involving days away from work in Missouri private industry in 2003. Traumatic injuries and disorders was the major nature category with the most nonfatal occupational injuries and illnesses in private industry, the total goods-producing sector, and the total service-providing sector. Traumatic injuries to muscles, tendons, ligaments, joints, etc. was the traumatic injury and disorder with the most nonfatal occupational injuries and illnesses in private industry, the total goods-producing sector, and the total service-providing sector. Nervous system and sense organs diseases was the systemic disease and disorder with the most injuries and illnesses in private industry, the total goods-producing sector, and the total service-providing sector. Symptoms was the symptom, sign, and ill-defined condition with the highest number of injuries and illnesses in private industry, the total goods-producing sector, and the total service-providing sector.

Table 21 presents the number of nonfatal occupational injuries and illnesses involving days away from work by part of body affected by the injury or illness and major industry sector in Missouri private industry in 2003. The numbers of nonfatal occupational injuries and illnesses involving days away from work for each part of body are listed for each goods-producing major industry sector and service-providing major industry sector. The major categories for part of body affected are: head; neck, including throat; trunk; upper extremities; lower extremities; body systems; multiple body parts; and nonclassifiable. Trunk had 7,930 (34.8 percent) of the 22,770 total nonfatal occupational injuries and illnesses involving days away from work in Missouri private industry in 2003. Trunk was the part of body with the most nonfatal occupational injuries and illnesses for private industry, the total goods-producing sector, and the total service-providing sector. Back, including spine, spinal cord was the subcategory of trunk with the most nonfatal occupational injuries and illnesses for private industry, the total goods-producing sector, and the total service-providing sector. Upper extremities was the part of body with the second most injuries and illnesses for private industry, the total goods-producing sector, and the total service-providing sector.

The number of nonfatal occupational injuries and illnesses involving days away from work by source of injury or illness and major industry sector in Missouri private industry in 2003 are presented in Table 22. The numbers of nonfatal occupational injuries and illnesses with days away from work for each source of injury or illness are listed for each goods-producing major industry sector and service-providing major industry sector. The major categories of source of injury or illness are: chemicals and chemical products; containers; furniture and fixtures; machinery; parts and materials; persons, plants, animals, and minerals; structures and surfaces; tools, instruments, and equipment; vehicles; other sources; and nonclassifiable. Persons, plants, animals, and minerals accounted for 5,830 (25.6 percent) of the 22,770 total nonfatal

occupational injuries and illnesses involving days away from work in Missouri private industry in 2003. Persons, plants, animals, and minerals was the source with the highest number of nonfatal occupational injuries and illnesses in private industry, the total goods-producing sector, and the total service-providing sector. Person—injured or ill worker was the subcategory of persons, plants, animals, and minerals with the highest number of nonfatal occupational injuries and illnesses for private industry, the total goods-producing sector, and the total service-providing sector. Structures and surfaces had the second highest numbers of injuries and illnesses for private industry, the total goods-producing sector, and the total service-providing sector.

Table 23 shows the number of nonfatal occupational injuries and illnesses involving days away from work by event or exposure leading to injury or illness and major industry sector in Missouri private industry in 2003. The numbers of nonfatal occupational injuries and illnesses involving days away from work for each event or exposure are listed for each goods-producing major industry sector and service-providing major industry sector. The major event or exposure categories are: contact with objects and equipment; falls; bodily reaction and exertion; exposure to harmful substances or environments; transportation accidents; assaults and violent acts; and nonclassifiable. Bodily reaction and exertion was the event or exposure responsible for 9,960 (43.7 percent) of the 22,770 total nonfatal occupation injuries and illnesses involving days away from work in Missouri private industry in 2003. Bodily reaction and exertion was the event with the highest number of nonfatal occupational injuries and illnesses in private industry, the total goods-producing sector, and the total service-providing sector. Overexertion was the subcategory of bodily reaction and exertion with the most nonfatal occupational injuries and illnesses in private industry, the total goods-producing sector, and the total service-providing sector. Contact with objects and equipment was the event with the second highest number of injuries and illnesses for private industry and the total goods-producing sector. Falls was the event with the second highest number of injuries and illnesses for the total service-providing sector.

Incidence rates for nonfatal occupational injuries and illnesses involving days away from work per 10,000 full-time workers for selected natures of injuries or illnesses and major industry sector in Missouri private industry in 2003 are presented in Table 24. The incidence rates for nonfatal occupational injuries and illnesses involving days away from work for each selected nature are listed for each goods-producing major industry sector and service-providing major industry sector. The categories of natures are the same as those listed for Table 20. The nature category with the highest incidence rate for nonfatal occupational injuries and illnesses involving days away from work for private industry in Missouri in 2003 was traumatic injuries and disorders with an incidence rate of 105.5. This incidence rate was decreased 18.8 percent from the incidence rate of 130.0 in 2002. The subcategory within traumatic injuries and disorders with the highest incidence rate was traumatic injuries to muscles, tendons, ligaments, joints, etc.

with an incidence rate of 52.9 for private industry. Traumatic injuries and disorders was the nature with the highest incidence rate for the total goods-producing sector at 166.9. Construction was the goods-producing major industry sector with the highest incidence rate for traumatic injuries and disorders at 266.3. Traumatic injuries and disorders was the also the nature with the highest incidence rate for the total service-providing sector at 87.7. Trade, transportation, and utilities was the service-providing major industry sector with the highest incidence rate at 145.4. Systemic diseases and disorders was the major nature category with the second highest incidence rate of nonfatal occupational injuries and illnesses involving days away from work for private industry in 2003 at 12.6. Systemic diseases and disorders was the nature with the second highest incidence rate for the total goods-producing sector and the total service-providing sector.

Table 25 presents the incidence rates for nonfatal occupational injuries and illnesses involving days away from work per 10,000 full-time workers for selected parts of body affected by injuries or illnesses and major industry sector in private industry in Missouri in 2003. The incidence rates for nonfatal occupational injuries and illnesses involving days away from work for each selected part of body are listed for each goods-producing major industry sector and service-providing major industry sector. The major categories of part of body are the same as those listed for Table 21. Trunk was the major part of body category with the highest incidence rate of nonfatal occupational injuries and illnesses with days away from work for private industry with an incidence rate of 41.6. This was a 13.0 percent reduction from the 2002 incidence rate of 47.8. Back, including spine, spinal cord was the subcategory of trunk with the highest incidence rate for private industry at 23.4. Trunk was the part of body with the highest incidence rate for the total goods-producing sector and the total service-providing sector with rates of 63.8 and 35.2, respectively. Upper extremities was the major part of body category with the second highest incidence rate of nonfatal occupational injuries and illnesses involving days away from work for private industry in 2003 at 32.2. Upper extremities was the part of body with the second highest incidence rate for both the total goods-producing sector and the total service-providing sector.

Table 26 shows the incidence rates for nonfatal occupational injuries and illnesses involving days away from work per 10,000 full-time workers for selected sources of injuries or illnesses and major industry sector in 2003 for Missouri private industry. The incidence rates for nonfatal occupational injuries and illnesses involving days away from work for each selected source of injury or illness are listed for each goods-producing major industry sector and service-providing major industry sector. The major categories of sources are the same as those listed for Table 22. In private industry, the major source category with the highest incidence rate for nonfatal occupational injuries and illnesses involving days away from work was persons, plants, animals, and minerals with an incidence rate of 30.6. This was a 16.6 percent decrease from the 2002

incidence rate of 36.7. Within the persons, plants, animals, and minerals category, the subcategory with the highest incidence rate for private industry was person—injured or ill worker at 24.3. Persons, plants, animals, and minerals was the source with the highest incidence rate for the total goods-producing sector and the total service-providing sector at 41.7 and 27.3, respectively. Structures and surfaces was the source category with the second highest incidence rate of nonfatal occupational injuries and illnesses involving days away from work in private industry in 2003 at 26.1. Structures and surfaces was the source with the second highest incidence rate for both the total goods-producing sector and the total service-providing sector.

Incidence rates for nonfatal occupational injuries and illnesses involving days away from work per 10,000 full-time workers for selected events or exposures leading to injuries or illnesses and major industry sector in 2003 in Missouri private industry are shown in Table 27. The incidence rates for nonfatal occupational injuries and illnesses involving days away from work for each selected event or exposure are listed for each goods-producing major industry sector and service-providing major industry sector. The major categories of events or exposures are the same as those listed for Table 23. The major category of event with the highest incidence rate for nonfatal occupational injuries and illnesses with days away from work for private industry was bodily reaction and exertion with an incidence rate of 52.2. This was a 13.9 percent reduction from the 2002 incidence rate of 60.6. Overexertion was the major subcategory within bodily reaction and exertion with the highest incidence rate at 27.8 for private industry. Bodily reaction and exertion was the event with the highest incidence rate for the total goods-producing sector at 79.9. Bodily reaction and exertion was also the event with the highest incidence rate for the total service-providing sector at 44.2. Contact with objects and equipment was the major event category with the second highest incidence rate of nonfatal occupational injuries and illnesses involving days away from work in private industry in 2003 at 29.2. Contact with objects and equipment was the event with the second highest incidence rate for the total goods-producing sector. Falls was the event with the second highest incidence rate for the total service-providing sector.

Table 28 presents the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by industry and number of days away from work in 2003 in Missouri private industry. The percent of total cases are presented for: 1 day; 2 days; 3 to 5 days; 6 to 10 days; 11 to 20 days; 21 to 30 days; and 31 days or more. Industries are listed as major industry sectors, sectors, and by NAICS codes. Median days away from work are also listed for each of the major industry sectors, sectors, and industries. The goods-producing industry sector with the most median days away from work was mining (NAICS 21) with 29 days. The goods-producing industry with the most median days away from work was masonry contractors (NAICS 23814) with 65 days. The service-providing industry sector with the highest number of median days away

from work was information (NAICS 51) with 16 days. The service-providing industry with the highest number of median days away from work was rail transportation (NAICS 482) with 35 days. Similar data for the major industry sectors only is presented in Table 12.

Table 29 shows the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by selected worker characteristics and number of days away from work in Missouri private industry in 2003. The percent of cases are presented for: 1 day; 2 days; 3 to 5 days; 6 to 10 days; 11 to 20 days; 21 to 30 days; and 31 days or more. The characteristics listed are: sex; age; length of service with employer; and race or ethnic origin. Median days away from work are also listed for each characteristic. Similar data are also presented in Table 8.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by occupation and number of days away from work in 2003 in Missouri private industry are shown in Table 30. There are 23 major groups of occupations. The percent of total cases are presented for: 1 day; 2 days; 3 to 5 days; 6 to 10 days; 11 to 20 days; 21 to 30 days; and 31 days or more. Median days away from work are also listed for each occupation. Architecture and engineering occupations was the major occupation group with the highest number of median days away from work at 18 days. Construction and extraction occupations was the major occupation group with the second highest median days away from work at 14 days. Supervisors, personal care and service workers was the occupation with the highest median days away from work in 2003 at 173 days. Glaziers was the occupation with the second highest median days away from work at 135 days. All (100.0 percent) of the cases for glaziers involved 31 days or more away from work. Similar data for major occupational groups only is shown in Table 9.

Table 31 presents the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by nature of injury or illness and number of days away from work in Missouri private industry in 2003. The major categories of natures are the same as those listed for Table 20. The percent of total cases are presented for: 1 day; 2 days; 3 to 5 days; 6 to 10 days; 11 to 20 days; 21 to 30 days; and 31 days or more. Median days away from work are also listed for each nature. Infectious and parasitic diseases was the major nature category with the highest number of median days away from work at 17 days. Systemic diseases and disorders was the major nature category with the second highest median days away from work at 14 days. The nature that had the highest median days away from work was nonspecified injuries and disorders, n.e.c. (not elsewhere classified) with 134 median days away from work. Infections of the skin and subcutaneous tissue, unspecified was the nature with the second highest median days away from work at 94 days.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by part of body affected by the injury or illness and number of days away from work in 2003 in Missouri private industry are presented in Table 32. The major categories of part of body are the same as listed for Table 21. The percent of total cases are presented for: 1 day; 2 days; 3 to 5 days; 6 to 10 days; 11 to 20 days; 21 to 30 days; and 31 days or more. Median days away from work are also listed for each part of body. Trunk was the major part of body category with the most median days away from work at 11 days. Lower extremities was the major part of body category with the second highest median days away from work at nine days. Pelvis was the part of body category with the most median days away from work at 63 days. Multiple trunk locations was the part of body category with the second highest number of median days away from work at 42 days. Most (75.0 percent) of the cases involving multiple trunk locations had 31 days or more away from work.

Table 33 shows the percent distribution of nonfatal occupational injuries and illnesses involving days away from work by source of injury or illness and number of days away from work in Missouri private industry in 2003. The categories of sources are the same as those defined for Table 22. The percent of total cases are presented for: 1 day; 2 days; 3 to 5 days; 6 to 10 days; 11 to 20 days; 21 to 30 days; and 31 days or more. Median days away from work are also listed for each source. Nonclassifiable was the major source category with the highest number of median days away from work with 21 days. Persons, plants, animals, and minerals; structures and surfaces; and vehicles were the major source categories with the next highest numbers of median days away from work at ten days each. Furniture, unspecified was the source with the highest number of median days away from work with 180 days. Food and beverage processing machinery – specialized, n.e.c. was the source with the second highest number of median days away from work at 158 days.

The percent distribution of nonfatal occupational injuries and illnesses involving days away from work by event or exposure leading to injury or illness and number of days away from work are shown in Table 34 for Missouri private industry in 2003. The major event or exposure categories are the same as those listed for Table 23. The percent of total cases are presented for: 1 day; 2 days; 3 to 5 days; 6 to 10 days; 11 to 20 days; 21 to 30 days; and 31 days or more. Median days away from work are also listed for each characteristic. Nonclassifiable was the major event category with the most median days away from work with 23 days. Falls, and bodily reaction and exertion were the major event categories with the next highest number of median days away from work at ten days. Noncollision accident, n.e.c. was the event with the highest number of median days away from work with 168 days. Sudden reaction when surprised, frightened, startled had the second highest median days away from work with 114 days.

Table 35 shows the number of nonfatal occupational injuries and illnesses involving days away from work by industry and time of event for Missouri private industry in 2003. The time of event category with the most nonfatal occupational injuries and illnesses for private industry, the total goods-producing sector, and the total service-providing sector was 8:01 am to 12:00 noon. This was the reported time of event with the most injuries and illnesses in all goods-producing and service-providing sectors except transportation and warehousing (NAICS 48-49) and arts, entertainment, and recreation (NAICS 71). The time of event with the most injuries and illnesses for these two sectors was 4:01 pm to 8:00 pm.

The number of nonfatal occupational injuries and illnesses involving days away from work by industry and hours worked for Missouri private industry in 2003 are shown in Table 36. The category of hours on the job before event occurred with the most nonfatal occupational injuries and illnesses was 2-4 hours for private industry, the total goods-producing sector, and the total service-providing sector. The industry sectors that had a different reported hours on the job before event occurred category were retail trade (NAICS 44-45); educational services (NAICS 61); and arts, entertainment, and recreation (NAICS 71). The hours on the job before event occurred category with the most injuries and illnesses for retail trade and arts, entertainment, and recreation was 4-6 hours. Less than 1 hour was the hours on the job before event occurred category with the most injuries and illnesses for educational services.

Table 37 shows the number of nonfatal occupational injuries and illnesses involving days away from work by industry and day of week in Missouri private industry in 2003. Tuesday was the day of week with the most nonfatal occupational injuries and illnesses for private industry and the total service-providing sector. Thursday was the day of week with the most injuries and illnesses for the total goods-producing sector.

Table 38 shows the number of nonfatal occupational injuries and illnesses involving days away from work by occupation and time of event in Missouri private industry in 2003. There are 22 major occupation groups listed along with occupations by occupation code. The time of event with the most nonfatal occupational injuries and illnesses involving days away from work for private industry was 8:01 am to 12:00 noon.

The number of nonfatal occupational injuries and illnesses involving days away from work by occupation and hours worked in Missouri private industry in 2003 is shown in Table 39. There are 22 major occupational groups listed along with occupations by occupation code. The hours on the job before event occurred with the most nonfatal occupational injuries and illnesses in private industry was 2-4 hours.

Table 40 shows the number of nonfatal occupational injuries and illnesses involving days away from work by occupation and day of week in Missouri private

industry in 2003. There are 22 major occupational groups listed along with occupations by occupation code. Tuesday was the day of week with the most nonfatal occupational injuries and illnesses in private industry.

The number of nonfatal occupational injuries and illnesses involving days away from work by nature and time of event in Missouri private industry in 2003 are shown in Table 41. The categories of natures are: traumatic injuries and disorders; systemic diseases and disorders; infectious and parasitic diseases; symptoms, signs, and ill-defined conditions; and other diseases, conditions, and disorders. The time of event with the most nonfatal occupational injuries and illnesses for private industry was 8:01 am to 12:00 noon.

Table 42 presents the number of nonfatal occupational injuries and illnesses involving days away from work by nature and hours worked in Missouri private industry in 2003. The categories of natures are the same as those listed for Table 41. The hours on the job before event occurred category with the most nonfatal occupational injuries and illnesses for private industry was 2-4 hours. The hours on the job before event occurred was not reported for many of the natures.

The number of nonfatal occupational injuries and illnesses involving days away from work by nature and day of week in Missouri private industry in 2003 are shown in Table 43. The categories of natures are the same as those listed for Table 41. The day of week with the most nonfatal occupational injuries and illnesses for private industry was Tuesday.

Table 44 shows the number of nonfatal occupational injuries and illnesses involving days away from work by part of body and time of event in Missouri private industry in 2003. The categories of part of body are the same as those listed for Table 21. The time of event with the most nonfatal occupational injuries and illnesses for private industry was 8:01 am to 12:00 noon.

The number of nonfatal occupational injuries and illnesses involving days away from work by part of body and hours worked for private industry in Missouri in 2003 are shown in Table 45. The categories of part of body are the same as those listed for Table 21. The category of hours on the job before event occurred with the most nonfatal occupational injuries and illnesses for private industry was 2-4 hours.

Table 46 presents the number of nonfatal occupational injuries and illnesses involving days away from work by part of body and day of week in Missouri private industry in 2003. The categories of part of body are head; neck, including throat; trunk; upper extremities; lower extremities; body systems; multiple body parts; and other body parts. The day of week with the most nonfatal occupational injuries and illnesses for private industry was Tuesday.

Table 47 presents the number of nonfatal occupational injuries and illnesses involving days away from work by source and time of event in Missouri private industry in 2003. The major categories of sources are the same as those listed for Table 22. The time of event category with the most nonfatal occupational injuries and illnesses for private industry was 8:01 am to 12:00 noon.

The number of nonfatal occupational injuries and illnesses involving days away from work by source and hours worked in Missouri private industry in 2003 is presented in Table 48. The major categories of sources are the same as those listed for Table 22. The hours on the job before event occurred category with the most nonfatal occupational injuries and illnesses for private industry was 2-4 hours.

Table 49 shows the number of nonfatal occupational injuries and illnesses involving days away from work by source and day of week in Missouri private industry in 2003. The major categories of sources are the same as those listed for Table 22. The day of week with the most nonfatal occupational injuries and illnesses in private industry was Tuesday.

The number of nonfatal occupational injuries and illnesses involving days away from work by event or exposure and time of event in Missouri private industry in 2003 are presented in Table 50. The major categories of event or exposure are the same as those listed for Table 23. The time of event category with the most nonfatal occupational injuries and illnesses for private industry was 8:01 am to 12:00 noon.

Table 51 shows the number of nonfatal occupational injuries and illnesses involving days away from work by event or exposure and hours worked for Missouri private industry in 2003. The major categories of event or exposure are the same as those listed for Table 23. The hours on the job before event occurred category with the most nonfatal occupational injuries and illnesses was 2-4 hours for private industry.

The number of nonfatal occupational injuries and illnesses involving days away from work by event or exposure and day of week in Missouri private industry in 2003 are shown in Table 52. The major categories of event or exposure are the same as those listed for Table 23. The day of week with the most nonfatal occupational injuries and illnesses for private industry was Tuesday.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Excludes farms with fewer than 11 employees.

<sup>3</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002: therefore estimates for these industries are not comparable to estimates in other industries.

<sup>4</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002: therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

SOURCE: Bureau of Labor Statistics, U. S. Department of Labor, Survey of Occupational Injuries and Illnesses in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Excludes farms with fewer than 11 employees.

<sup>3</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002: therefore estimates for these industries are not comparable to estimates in other industries.

<sup>4</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002: therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

SOURCE: Bureau of Labor Statistics, U. S. Department of Labor, Survey of Occupational Injuries and Illnesses in cooperation with participating State agencies.

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

N = number of injuries and illnesses

EH = total hours worked by all employees during calendar year

20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Days away from work cases include those that result in days away from work with or without job transfer or restriction.

<sup>3</sup> Excludes farms with fewer than 11 employees.

<sup>4</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in

coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>5</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

Other services, except public administration.....	100.0	11.3	9.4	34.0	9.4	7.5	11.3	17.0	4

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Excludes farms with fewer than 11 employees.

<sup>3</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>4</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Excludes farms with fewer than 11 employees.

<sup>3</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002: therefore estimates for these industries are not comparable to estimates in other industries.

<sup>4</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002: therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

SOURCE: Bureau of Labor Statistics, U. S. Department of Labor, Survey of Occupational Injuries and Illnesses in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the North American Industry Classification System, 2002 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors

are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

Tank car, truck, and ship loaders . . . . .	--	0.2	--	--	0.2	--	--	--	--	--	--	--	--

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Excludes farms with fewer than 11 employees.

<sup>3</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>4</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration,

U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately. n.e.c. = not elsewhere classified.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Excludes farms with fewer than 11 employees.

<sup>3</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>4</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration,

U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately. n.e.c. = not elsewhere classified.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Excludes farms with fewer than 11 employees.

<sup>3</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>4</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration,

U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately. n.e.c. = not elsewhere classified.

**Table 24. Incidence rates<sup>1</sup> for nonfatal occupational injuries and illnesses involving days away from work<sup>2</sup> per 10,000 full-time workers for selected natures of injuries or illnesses and major industry sector, 2003 -- Continued**

**Missouri--private industry**

Nature	Private industry <sup>3</sup>	Goods producing <sup>3</sup>				Service providing							
		Total goods producing <sup>3</sup>	Natural resources and mining <sup>3,4</sup>	Construction	Manufacturing	Total service providing	Trade, transportation, and utilities <sup>5</sup>	Information	Financial activities	Professional and business services	Education and health services	Leisure and hospitality	Other services
Symptoms involving nervous and musculoskeletal systems, n.e.c. ....	0.4	--	--	1.7	--	0.3	--	--	--	--	1.8	--	--
Symptoms involving respiratory system and chest .....	0.2	--	--	--	--	--	--	--	--	--	--	--	--

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as:  $(N/EH) \times 20,000,000$  where

N = number of injuries and illnesses  
EH = total hours worked by all employees during calendar year  
20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>3</sup> Excludes farms with fewer than 11 employees.

<sup>4</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor.

Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>5</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available or data for incidence rates less than 0.1 per 10,000 full-time workers. Major classifications may include detailed classifications not shown separately.

n.e.c. = not elsewhere classified.

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

N = number of injuries and illnesses  
EH = total hours worked by all employees during calendar year  
20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>3</sup> Excludes farms with fewer than 11 employees.

<sup>4</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor.

Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>5</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available or data for incidence rates less than 0.1 per 10,000 full-time workers. Major classifications may include detailed classifications not shown separately.

n.e.c. = not elsewhere classified.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

**Table 26. Incidence rates<sup>1</sup> for nonfatal occupational injuries and illnesses involving days away from work per 10,000 full-time workers for selected sources of injuries or illnesses and major industry sector, 2003 -- Continued**

**Missouri--private industry**

Source	Private industry <sup>3</sup>	Goods producing <sup>3</sup>				Service providing							
		Total goods producing <sup>3</sup>	Natural resources and mining <sup>3,4</sup>	Construction	Manufacturing	Total service providing	Trade, transportation, and utilities <sup>5</sup>	Information	Financial activities	Professional and business services	Education and health services	Leisure and hospitality	Other services
Water .....	0.3	--	--	--	0.7	--	--	--	--	--	--	--	--
<b>Nonclassifiable</b> .....	1.6	1.9	17.7	3.3	0.7	1.6	3.0	--	--	--	--	--	--

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as:  $(N/EH) \times 20,000,000$  where

N = number of injuries and illnesses  
EH = total hours worked by all employees during calendar year  
20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>3</sup> Excludes farms with fewer than 11 employees.

<sup>4</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor.

Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>5</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available or data for incidence rates less than 0.1 per 10,000 full-time workers. Major classifications may include detailed classifications not shown separately.

n.e.c. = not elsewhere classified.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

**Table 27. Incidence rates<sup>1</sup> for nonfatal occupational injuries and illnesses involving days away from work per 10,000 full-time workers for selected events or exposures leading to injuries or illnesses and major industry sector, 2003 -- Continued**

**Missouri--private industry**

Event	Private industry <sup>3</sup>	Goods producing <sup>3</sup>				Service providing							
		Total goods producing <sup>3</sup>	Natural resources and mining <sup>3,4</sup>	Construction	Manufacturing	Total service providing	Trade, transportation, and utilities <sup>5</sup>	Information	Financial activities	Professional and business services	Education and health services	Leisure and hospitality	Other services
Assaults by animals . . . . .	0.1	--	--	--	--	--	--	--	--	--	--	--	--
<b>Nonclassifiable . . . . .</b>	<b>1.2</b>	<b>1.4</b>	<b>--</b>	<b>3.3</b>	<b>0.7</b>	<b>1.1</b>	<b>1.7</b>	<b>--</b>	<b>--</b>	<b>--</b>	<b>0.7</b>	<b>--</b>	<b>--</b>

<sup>1</sup> Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: (N/EH) x 20,000,000 where

N = number of injuries and illnesses  
EH = total hours worked by all employees during calendar year  
20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

<sup>2</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>3</sup> Excludes farms with fewer than 11 employees.

<sup>4</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor.

Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>5</sup> Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available or data for incidence rates less than 0.1 per 10,000 full-time workers. Major classifications may include detailed classifications not shown separately.

n.e.c. = not elsewhere classified.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

SOURCE: Bureau of Labor Statistics, U. S. Department of Labor, Survey of Occupational Injuries and Illnesses in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

NOTE: Dashes indicate data that are not available. Because of rounding, percentages may not add to 100. Major classifications may include detailed classifications not shown separately. n.e.c. = not elsewhere classified.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

NOTE: Dashes indicate data that are not available. Because of rounding, percentages may not add to 100. Major classifications may include detailed classifications not shown separately. n.e.c. = not elsewhere classified.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

NOTE: Dashes indicate data that are not available. Because of rounding, percentages may not add to 100. Major classifications may include detailed classifications not shown separately. n.e.c. = not elsewhere classified.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded.

These data reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

Nonclassifiable . . . . .	9999	--	--	--	--	--	--	--	--	--	--	--	--

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded.

These data reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

Anxiety, stress, neurotic disorders, unspecified . . . . .	5210	--	--	--	--	--	--	--	--
Nonclassifiable . . . . .	9999	--	--	--	--	--	--	--	--

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

SOURCE: Bureau of Labor Statistics, U.S. Department of Labor, Survey of Occupational Injuries and Illnesses, in cooperation with participating State agencies.

<sup>1</sup> Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

<sup>2</sup> Totals include data for industries not shown separately.

<sup>3</sup> *North American Industry Classification System* Manual -- United States, 2002 Edition

<sup>4</sup> Excludes farms with fewer than 11 employees.

<sup>5</sup> Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2002) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>6</sup> Data for mining operators in this industry are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

<sup>7</sup> Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

NOTE: Dashes indicate data that are not available. Because of rounding, data may not sum to the totals. Major classifications may include detailed classifications not shown separately.

**Appendix A**  
**Survey of Occupational Injuries and Illnesses**  
**2003 Survey Form**

# Survey of Occupational Injuries and Illnesses, 2003

U.S. Department of Labor  
Bureau of Labor Statistics

Please correct your company address

## Dear Employer:

This survey asks employers to provide information about occupational injuries and illnesses based upon the information you have maintained for Calendar Year 2003 on your *OSHA Forms for Recording Work-Related Injuries and Illnesses*. Copies of these forms were mailed to you in late 2002. Although participation in this survey is mandatory under Public Law 91-596, we have made every effort to reduce the amount of time required wherever possible and still collect the necessary information. To the full extent permitted by law, this information will be held in confidence and be used only for statistical purposes. Contact information is included for each State to provide you with assistance in completing this survey.

For your convenience, you can submit your survey response online at <https://idcf.bls.gov>

Bureau of Labor Statistics  
U.S. Department of Labor

**N**

We estimate it will take you an average of 24 minutes to complete this survey (ranging from 10 minutes to 5 hours per package), including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing this information. If you have any comments regarding the estimates or any other aspect of this survey, including suggestions for reducing this burden, please send them to the Bureau of Labor Statistics, Occupational Safety and Health Statistics (1220-0045), 2 Massachusetts Avenue, N.E., Washington, DC 20212. Persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. **DO NOT SEND THE COMPLETED FORM TO THIS ADDRESS.**

The Bureau of Labor Statistics and the State agency collecting this information will use the information you provide for statistical purposes only. To the full extent permitted by law, this information will be held in confidence and will not be disclosed without the written consent of your establishment.

OMB No. 1220-0045  
Approval expires 10-31-04  
BLS-9300 N06

# Who must complete the Survey of Occupational Injuries and Illnesses?

Under Public Law 91-596, all establishments that receive this survey must complete and return it within 30 days, even if they had no work-related injuries and illnesses during 2003.

## What do you need to do?

- Identify the **Reporting Site** referred to on the front cover. Complete this survey **only** for the establishment(s) noted on the front cover under **Reporting Site**.
- Check **Your Company Address** printed on the front cover. Make any necessary corrections directly on the front cover.
- Refer to your **Reporting Site's OSHA Forms for Recording Work-Related Injuries and Illnesses**. Copies of these forms were mailed to you in late 2002.
  - your 2003 *Log of Work-Related Injuries and Illnesses* (OSHA Form 300),
  - your 2003 *Summary of Work-Related Injuries and Illnesses* (OSHA Form 300A), and
  - your supplemental records of cases with days away from work (OSHA Form 301 or an equivalent).
- Complete **Part 1A and Part 1B**. You can either photocopy your OSHA Form 300A or you can transcribe the entries noted below from your OSHA Form 300A to this survey form.

OSHA's Form 300A  
**Summary of Work-Related Injuries and Illnesses**

Year 20\_\_\_\_  
U.S. Department of Labor  
Occupational Safety and Health Administration

All establishments covered by Part 1910 must complete this Summary page, even if no work-related injuries or illnesses occurred during the year. Furthermore, to ensure the Log is ready for the annual summary and statistical reporting, employers must complete the Log by the end of the year. Copy the Log, attach the individual entries you made for each employee. Then enter the totals below, making sure you've copied the entries from every page of the Log. If you had no cases, write "0".

Employers, federal agencies, and their representatives have the right to review the OSHA Form 300 and its entries. They also have limited access to the OSHA Form 301 or its equivalent. See 29 CFR Part 1910.33, or OSHA's recordkeeping rule, for further details on the access provisions for these forms.

(2) Skin disorders	_____	(5) All other illnesses	_____
(3) Respiratory conditions	_____		

Part this Summary page from February 1 to April 30 of the year following the year covered by the form.

Public reporting burden for this collection of information is estimated to average 10 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any aspect of this collection of information, including suggestions for reducing this burden, to Washington, DC 20503. Do not send this collection of information to the office.

**Establishment Information**

Your establishment name \_\_\_\_\_

Street \_\_\_\_\_

City \_\_\_\_\_ State \_\_\_\_\_ Zip \_\_\_\_\_

Industry description (e.g., Manufacturer of motor vehicles) \_\_\_\_\_

Standard Industrial Classification (SIC), if known (e.g., SIC 3711) \_\_\_\_\_

**Employment Information** (If you don't have these figures, see the Worksheet on the back of this page to estimate.)

Actual average number of employees \_\_\_\_\_

Total hours worked by all employees last year \_\_\_\_\_

Knowingly falsifying this document may result in a fine.

I certify that I have examined this document and that to the best of my knowledge the entries are true, accurate, and complete.

Company name \_\_\_\_\_ Title \_\_\_\_\_

Print \_\_\_\_\_ Sign \_\_\_\_\_

Copy this information to Part 1B of this survey form.

Copy this information to Part 1A of this survey form.

- Complete **Part 2: Reporting Cases with Days Away from Work** if your establishment had any worker injuries or illnesses that resulted in days away from work in 2003.
- Write the name of the contact person we should call with questions in **Contact Information** on the back cover of this booklet.
- Return this survey booklet and any attachments in the enclosed envelope within 30 days of the date your establishment received it.

## Part 1A. Establishment Information

Using your completed Calendar Year 2003 *Summary of Work-Related Injuries and Illnesses (OSHA Form 300A)*, copy the establishment information into the boxes below. If more than one establishment is noted on the front cover under **Reporting Site**, add together the total lines from each specified establishment's OSHA Form 300A to complete the 2003 totals for all establishments. Then copy those totals into the corresponding spaces below. If these numbers are not available on your OSHA Form 300A, or if your establishment does not keep records needed to answer (1) and (2) below, you can estimate using the steps that follow.

1. For the reporting site identified on the cover:  
**Enter the annual average employment for 2003.**  
(You can copy this from your OSHA Form 300A.)

Annual average number  
of employees for 2003

### If needed: Steps to estimate employment

**STEP 1:** Add the number of employees your establishment paid in every pay period during 2003. **Include all employees:** full-time, part-time, temporary, seasonal, salaried, and hourly.

Acme Construction pays its employees 26 times each year.  
During 2003,

In this pay period	Acme paid this many employees
1 .....	10
2 .....	0
3 .....	15
↓	↓
25 .....	15
26 .....	10
	830 (sum)

**STEP 2:** Divide the sum by the number of pay periods your establishment had in 2003. **Include** any pay periods when you had **no** employees.

Because Acme has 26 pay periods, it would divide its sum by 26.  $830 \text{ divided by } 26 = 31.92$

**STEP 3:** Round the answer to the next highest whole number. Write the rounded number in the box marked Annual average number of employees.

Acme would round 31.92 to 32 and write that number in the box marked Annual average number of employees.

2. For the reporting site identified on the cover:  
**Enter the total hours worked for 2003.**  
(You can copy this from your OSHA Form 300A.)

Total hours worked  
by all employees in 2003

**Note:** Total Hours Worked should exclude vacation, sick leave, holidays, and other non-work time.

### If needed: Steps to estimate total hours worked

**STEP 1:** Find the number of full-time employees in your establishment for 2003.

ABC Company had 15 full-time employees during 2003.

**STEP 2:** Multiply this number by the number of hours worked for a full-time employee in a year. This is equal to the number of full-time hours worked:

ABC Company's 15 full-time employees worked an average of about 1,760 hours each per year after excluding vacation, sick leave, holidays, and other non-work time. (*The hours worked for a full-time employee in a year may be different at your reporting site*)

15 (full-time employees) times 1,760 (hours worked by a full-time employee in a year) equals 26,400 full-time hours.

**STEP 3:** Add the number of any overtime hours and the number of hours worked by other employees (part-time, temporary, seasonal) to the amount in Step 2:

ABC Company's full-time employees worked a total of 1,500 hours of overtime. In addition, 3 part-time employees worked a total of 2,715 hours during 2003. Adding these hours to those from Step 2:

Full-time hours from Step 2		26,400
Overtime hours	+	1,500
Part-time hours	+	2,715
Total hours worked by all employees in 2003	=	30,615

3. Check any conditions that might have affected your annual average number of employees or total hours worked during 2003:

- |   |  |
|---|--|
| <input type="checkbox"/> Strike or lockout                              | <input type="checkbox"/> Shorter work schedules or fewer pay periods than usual              |
| <input type="checkbox"/> Shutdown or layoff                             | <input type="checkbox"/> Longer work schedules or more pay periods than usual                |
| <input type="checkbox"/> Seasonal work                                  | <input type="checkbox"/> Other reason: _____   |
| <input type="checkbox"/> Natural disaster or adverse weather conditions | <input type="checkbox"/> Nothing unusual happened to affect our employment or hours figures. |

## Did you have ANY occupational injuries or illnesses during 2003?

- ☐ Yes. Go to the next section, **Part 1B: Summary of Work-Related Injuries and Illnesses, 2003**.
- ☐ No. Go to **Contact Information** on the back cover.

## Part 1B: Summary of Work-Related Injuries and Illnesses, 2003

Using your completed Calendar Year 2003 *Summary of Work-Related Injuries and Illnesses (OSHA Form 300A)*:

- 1 Copy the establishment summary information into the spaces below. If more than one establishment is noted on the front cover under **Reporting Site**, add together the total lines from each specified establishment's OSHA Form 300A to complete the 2003 totals for all establishments. Then copy those totals into the corresponding spaces below.
- 2 If you prefer, you may enclose a photocopy of your *Summary of Work-Related Injuries and Illnesses (OSHA Form 300A)*. If more than one establishment is noted on the front cover under **Reporting Site**, be sure to include the OSHA Form 300A for all of the specified establishments.
- 3 If any total is zero on your OSHA Form 300A, write "0" in that total's space below.

### Number of Cases

Total number of  
deaths

(G)

Total number of  
cases with days  
away from work

(H)

Total number of  
cases with job  
transfer or restriction

(I)

Total number of  
other recordable  
cases

(J)

### Number of Days

Total number of days of  
job transfer or restriction

(K)

Total number of days  
away from work

(L)

### Injury and Illness Types

Total number of ...  
(M)

(1) Injuries

(2) Skin disorders

(3) Respiratory conditions

(4) Poisonings

(5) All other illnesses

- ▶ The total **Number of Cases** recorded above in G + H + I + J must equal the total **Injury and Illness Types** recorded above in M (1 + 2 + 3 + 4 + 5).
- ▶ If you had any work-related deaths in 2003, please tell us where you assigned/classified each death within the list of items (M1) through (M5) provided under section **Injury and Illness Type** above (e.g., "fatal case was due to injury resulting from fall" or "death resulted from respiratory conditions").

## Before you continue...

Look at the total **Number of Cases** you entered in Column H above.

- ▶ If you had **NO** cases in Column H, you are finished with the survey. Go to **Contact Information** on the Back Cover.
- ▶ If you had cases in Column H, Go to **Part 2: Reporting Cases with Days Away from Work**.

## Part 2: Reporting Cases with Days Away from Work

This part of the survey asks you about individual injuries and illnesses that resulted in an employee being away from work. Several copies of the form *Case with Days Away from Work* are included. To answer the questions on this form, you'll need:

- ▶ your completed copy of the 2003 *Log* (OSHA Form 300)

Part 2 asks about injuries or illnesses with a check in Column H of your Log.

- ▶ your completed copies of supplementary documents about the case, such as a workers' compensation report, an accident report, an insurance form, or the *Injury and Illness Incident Report* (OSHA Form 301).

## Which cases should you report?

To identify the individual cases to report, follow these steps:

- 1 Go to your completed 2003 OSHA Form 300. If more than one establishment is noted on the front cover under Reporting Site, be sure to look at all your OSHA Form 300's to find which cases to report.
- 2 Mark each case that has a check in **column (H) on the Log** (OSHA Form 300). These are the **only** cases you should report.
- 3 We have designed this survey to ensure that you do not have to report more than approximately 30 cases. If you have significantly more than 30 cases, please go to *If You Need Help . . .* at the back of this booklet and call the phone number listed for your State for assistance.
- 4 Fill out one *Case with Days Away from Work* form for each case that you identified in Step 2. You can find most of the information on a supplementary document such as a workers' compensation report, an accident report, an insurance form, or the *Injury and Illness Incident Report* (OSHA Form 301).  
  
(If you need more *Case with Days Away from Work* forms, you may either photocopy a blank one or go to *If You Need Help . . .* at the back of this booklet and call the phone number listed for your State).
- 5 When you have finished, proceed to *Contact Information* on the back cover of this booklet.

# Case with Days Away from Work

Tell us about a 2003 occupational injury or illness **only** if it resulted in days away from work. To find out which case(s) you should report, read the instructions at the beginning of **Part 2: Reporting Cases with Days away from Work**.

## Tell us about the Case

Go to your completed OSHA Form 300. Copy the case information from that form into the spaces below.

Employee's name (column B)	Job title (column C)	Date of injury or onset of illness (column D)	Number of days of job transfer or restriction (column K)	Number of days away from work (column L)
		/ /03 <small>month day year</small>		

## Tell us about the Employee

Check the category which **best** describes the employee's regular type of job or work: (optional)

- |   |   |
|---|---|
| <input type="checkbox"/> Office, professional, business, or management staff    | <input type="checkbox"/> Healthcare   |
| <input type="checkbox"/> Sales  | <input type="checkbox"/> Delivery or driving  |
| <input type="checkbox"/> Product assembly, product manufacture                  | <input type="checkbox"/> Food service   |
| <input type="checkbox"/> Repair, installation or service of machines, equipment | <input type="checkbox"/> Cleaning, maintenance of building, grounds                         |
| <input type="checkbox"/> Construction   | <input type="checkbox"/> Material handling (e.g. stocking, loading/unloading, moving, etc.) |
| <input type="checkbox"/> Other: _____   | <input type="checkbox"/> Farming  |

Employee's race or ethnic background: (optional-check one or more)

- ☐ American Indian or Alaska Native  
☐ Asian  
☐ Black or African American  
☐ Hispanic or Latino  
☐ Native Hawaiian or Other Pacific Islander  
☐ White  
☐ Not available

NOTE: You may either answer questions (3) to (11) or attach a copy of a supplementary document that answers them.

3. Employee's age: \_\_\_\_\_ OR date of birth: \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_  
month day year

4. Employee's date hired: \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_  
month day year

OR check length of service at establishment when incident occurred:

- ☐ Less than 3 months  
☐ From 3 to 11 months  
☐ From 1 to 5 years  
☐ More than 5 years

5. Employee's sex:

- ☐ Male  
☐ Female

## Tell us about the Incident

Answer the questions below or attach a copy of a supplementary document that answers them.

6. Time employee began work: \_\_\_\_\_ ☐ am ☐ pm

7. Time of event: \_\_\_\_\_ ☐ am ☐ pm OR ☐ Check if time cannot be determined

8. What was the employee doing just before the incident occurred? Describe the activity as well as the tools, equipment, or material the employee was using. Be specific. *Examples:* "climbing a ladder while carrying roofing materials"; "spraying chlorine from hand sprayer"; "daily computer key-entry."

9. What happened? Tell us how the injury or illness occurred. *Examples:* "When ladder slipped on wet floor, worker fell 20 feet"; "Worker was sprayed with chlorine when gasket broke during replacement"; "Worker developed soreness in wrist over time."

10. What was the injury or illness? Tell us the part of the body that was affected and how it was affected; be more specific than "hurt," "pain," or "sore." *Examples:* "strained back"; "chemical burn, hand"; "carpal tunnel syndrome."

11. What object or substance directly harmed the employee? *Examples:* "concrete floor"; "chlorine"; "radial arm saw." If this question does not apply to the incident, leave it blank.

## Contact Information

Fill in the name, title, and phone number of the person we should call with questions about the survey.

Printed name \_\_\_\_\_

( ) \_\_\_\_\_  
Telephone number

Ext. \_\_\_\_\_

( ) \_\_\_\_\_  
Fax number

Title \_\_\_\_\_

/ /  
Today's date

Use the return envelope to send us the **entire package** -- everything that we sent you -- within 30 days of the date your establishment received it. If the return envelope is missing, send the **entire package** to the return address on the front cover (look for *Address for Return Envelope*).

## If You Need Help . . .

If you have any questions or if you need help completing this survey, call the phone number that is listed below for your State. The phone number may be for an office outside your State, but they will be able to help you. If you prefer to write, send your letter to the return address on the front of this package

## **Appendix B**

# **OSHA Recordkeeping Guidelines**

## An Overview:

# Recording Work-Related Injuries and Illnesses

The Occupational Safety and Health (OSH) Act of 1970 requires certain employers to prepare and maintain records of work-related injuries and illnesses. Use these definitions when you classify cases on the Log. OSHA's recordkeeping regulation (see 29 CFR Part 1904) provides more information about the definitions below.

**The Log of Work-Related Injuries and Illnesses** (Form 300) is used to classify work-related injuries and illnesses and to note the extent and severity of each case. When an incident occurs, use the Log to record specific details about what happened and how it happened.

The **Summary** — a separate form (Form 300A) — shows the totals for the year in each category. At the end of the year, post the Summary in a visible location so that your employees are aware of the injuries and illnesses occurring in their workplace.

Employers must keep a Log for each establishment or site. If you have more than one establishment, you must keep a separate Log and Summary for each physical location that is expected to be in operation for one year or longer.

Note that your employees have the right to review your injury and illness records. For more information, see 29 Code of Federal Regulations Part 1904.35, *Employee Involvement*.

Cases listed on the **Log of Work-Related Injuries and Illnesses** are not necessarily eligible for workers' compensation or other insurance benefits. Listing a case on the Log does not mean that the employer or worker was at fault or that an OSHA standard was violated.

### When is an injury or illness considered work-related?

An injury or illness is considered work-related if an event or exposure in the work environment caused or contributed to the condition or significantly aggravated a preexisting condition. Work-relatedness is

presumed for injuries and illnesses resulting

from events or exposures occurring in the workplace, unless an exception specifically applies. See 29 CFR Part 1904.5(b)(2) for the exceptions. The work environment includes the establishment and other locations where one or more employees are working or are present as a condition of their employment. See 29 CFR Part 1904.5(b)(1).

### Which work-related injuries and illnesses should you record?

Record those work-related injuries and illnesses that result in:

- ▼ death,
  - ▼ loss of consciousness,
  - ▼ days away from work,
  - ▼ restricted work activity or job transfer, or
  - ▼ medical treatment beyond first aid.
- You must also record work-related injuries and illnesses that are significant (as defined below) or meet any of the additional criteria listed below.

You must record any significant work-related injury or illness that is diagnosed by a physician or other licensed health care professional. You must record any work-related case involving cancer, chronic irreversible disease, a fractured or cracked bone, or a punctured eardrum. See 29 CFR 1904.7.

### What do you need to do?

1. Within 7 calendar days after you receive information about a case, decide if the case is recordable under the OSHA recordkeeping requirements.
  2. Determine whether the incident is a new case or a recurrence of an existing one.
  3. Establish whether the case was work-related.
  4. If the case is recordable, decide which form you will fill out as the injury and illness incident report.
- You may use OSHA's 301, *Injury and Illness Incident Report* or an equivalent form. Some state workers compensation, insurance, or other reports may be acceptable substitutes, as long as they provide the same information as the OSHA 301.

### How to work with the Log

1. Identify the employee involved unless it is a privacy concern case as described below.
2. Identify when and where the case occurred.
3. Describe the case, as specifically as you can.
4. Classify the seriousness of the case by recording the **most serious outcome** associated with the case, with column J (Other recordable cases) being the least serious and column G (Death) being the most serious.
5. Identify whether the case is an injury or illness. If the case is an injury, check the injury category. If the case is an illness, check the appropriate illness category.

### What is medical treatment?

Medical treatment includes managing and caring for a patient for the purpose of combating disease or disorder. The following are not considered medical treatments and are NOT recordable:

- ▼ visits to a doctor or health care professional solely for observation or counseling;
- ▼ diagnostic procedures, including administering prescription medications that are used solely for diagnostic purposes; and
- ▼ any procedure that can be labeled first aid. (See below for more information about first aid.)

### What is first aid?

If the incident required only the following types of treatment, consider it first aid. Do NOT record the case if it involves only:

- ▼ using non-prescription medications at non-prescription strength;
- ▼ administering tetanus immunizations;
- ▼ cleaning, flushing, or soaking wounds on the skin surface;
- ▼ using wound coverings, such as bandages, BandAids™, gauze pads, etc., or using SteriStrips™ or butterfly bandages.
- ▼ using hot or cold therapy;
- ▼ using any totally non-rigid means of support, such as elastic bandages, wraps, non-rigid back belts, etc.;
- ▼ using temporary immobilization devices while transporting an accident victim (splints, slings, neck collars, or back boards).
- ▼ drilling a fingernail or toenail to relieve pressure, or draining fluids from blisters;
- ▼ using eye patches;
- ▼ using simple irrigation or a cotton swab to remove foreign bodies not embedded in or adhered to the eye;
- ▼ using irrigation, tweezers, cotton swab or other simple means to remove splinters or foreign material from areas other than the eye;
- ▼ using finger guards;
- ▼ using massages;
- ▼ drinking fluids to relieve heat stress

### How do you decide if the case involved restricted work?

Restricted work activity occurs when, as the result of a work-related injury or illness, an employer or health care professional keeps, or recommends keeping, an employee from doing the routine functions of his or her job or from working the full workday that the employee would have been scheduled to work before the injury or illness occurred.

### How do you count the number of days of restricted work activity or the number of days away from work?

Count the number of calendar days the employee was on restricted work activity or was away from work as a result of the recordable injury or illness. Do not count the day on which the injury or illness occurred in this number. Begin counting days from the day after the incident occurs. If a single injury or illness involved both days away from work and days of restricted work activity, enter the total number of days for each. You may stop counting days of restricted work activity or days away from work once the total of either or the combination of both reaches 180 days.

### Under what circumstances should you NOT enter the employee's name on the OSHA Form 300?

You must consider the following types of injuries or illnesses to be privacy concern cases:

- ▼ an injury or illness to an intimate body part or to the reproductive system,

### What if the outcome changes after you record the case?

If the outcome or extent of an injury or illness changes after you have recorded the case, simply draw a line through the original entry (if you wish, delete or white-out the original entry). Then write the new entry where it belongs. Remember, you need to record the most serious outcome for each case.

### Classifying injuries

An injury is any wound or damage to the body resulting from an event in the work environment.

**Examples:** Cut, puncture, laceration, abrasion, fracture, bruise, contusion, chipped tooth, amputation, insect bite, electrocution, or a thermal, chemical, electrical, or radiation burn. Sprain and strain injuries to muscles, joints, and connective tissues are classified as injuries when they result from a slip, trip, fall or other similar accidents.

▼ an injury or illness resulting from a sexual assault,

- ▼ a mental illness,
- ▼ a case of HIV infection, hepatitis, or tuberculosis,
- ▼ a needlestick injury or cut from a sharp object that is contaminated with blood or other potentially infectious material (see 29 CFR Part 1904.8 for definition), and
- ▼ other illnesses, if the employee independently and voluntarily requests that his or her name not be entered on the log.

You must not enter the employee's name on the OSHA 300 Log for these cases. Instead, enter "privacy case" in the space normally used for the employee's name. You must keep a separate, confidential list of the case numbers and employee names for the establishment's privacy concern cases so that you can update the cases and provide information to the government if asked to do so.

If you have a reasonable basis to believe that information describing the privacy concern case may be personally identifiable even though the employee's name has been omitted, you may use discretion in describing the injury or illness on both the OSHA 300 and 301 forms. You must enter enough information to identify the cause of the incident and the general severity of the injury or illness, but you do not need to include details of an intimate or private nature.

## Classifying illnesses

### Skin diseases or disorders

Skin diseases or disorders are illnesses involving the worker's skin that are caused by work exposure to chemicals, plants, or other substances.

**Examples:** Contact dermatitis, eczema, or rash caused by primary irritants and sensitizers or poisonous plants; oil acne; friction blisters, chrome ulcers; inflammation of the skin.

### Respiratory conditions

Respiratory conditions are illnesses associated with breathing hazardous biological agents, chemicals, dust, gases, vapors, or fumes at work.

**Examples:** Silicosis, asbestosis, pneumonitis, pharyngitis, rhinitis or acute congestion; farmer's lung, beryllium disease, tuberculosis, occupational asthma, reactive airways dysfunction syndrome (RADS), chronic obstructive pulmonary disease (COPD), hypersensitivity pneumonitis, toxic inhalation injury, such as metal fume fever, chronic obstructive bronchitis, and other pneumoconioses.

### Poisoning

Poisoning includes disorders evidenced by abnormal concentrations of toxic substances in blood, other tissues, other bodily fluids, or the breath that are caused by the ingestion or absorption of toxic substances into the body.

**Examples:** Poisoning by lead, mercury, cadmium, arsenic, or other metals; poisoning by carbon monoxide, hydrogen sulfide, or other

## When must you post the Summary?

You must post the Summary only — not the Log — by February 1 of the year following the year covered by the form and keep it posted until April 30 of that year.

## How long must you keep the Log and Summary on file?

You must keep the Log and Summary for 5 years following the year to which they pertain.

## Do you have to send these forms to OSHA at the end of the year?

No. You do not have to send the completed forms to OSHA unless specifically asked to do so.

## How can we help you?

If you have a question about how to fill out the Log,

- ☐ visit us online at [www.osha.gov](http://www.osha.gov) or
- ☐ call your local OSHA office.

## **Appendix C**

### **Definitions**

**Bench marking.** The process of adjusting a set of estimates based on a reference of standard for one or more of the estimates. In the annual survey, it is used to increase the precision of the estimates (due to the use of a ratio estimator) and to impute for births (i.e., adjust for new companies). The reference used is the annual average employment.

**Days away from work or days of restricted work activity.** Count the number of calendar days the employee was on restricted work activity or was away from work as a result of the recordable injury or illness. Do not count the day on which the injury or illness occurred. Begin counting days from the day after the incident occurred. If a single injury or illness involved both days away from work and days of restricted work activity, enter the total number of days for each. Stop counting days away from work or days of restricted work activity once the total of either or the combination of both reaches 180 days.

**Days of job transfer or restricted work activity.** The number of workdays on which, because of injury or illness:

1. the employee was assigned to another job on a temporary basis;
2. the employee worked at a permanent job less than full-time; or
3. the employee worked at a permanently assigned job but could not perform all duties normally connected with it.

**Establishment.** A single physical location where business is conducted or where services or industrial operations are performed. Where distinctly separate activities are performed at a single physical location, each activity is treated as a separate establishment.

**Event or exposure.** The event or exposure describes the manner in which the injury or illness was produced or inflicted by the source of injury or illness.

**First-aid treatment.** One time treatment and subsequent observation of minor scratches, cuts, burns, splinters, etc., which do not ordinarily require medical care.

**Hours worked.** The total hours worked by all employees during the report period. Includes all time on duty, but does not include vacation, holidays, sick leave and all other non-work time even though paid.

**Incidence rate.** An incidence rate is the number of recordable injuries and/or illnesses occurring among a given number of full-time workers (usually 100 full-time workers) over a given period of time (usually one year). The rate is calculated as: **(N/EH) X 200,000** where:  
**N** = number of occupational injuries and/or illnesses or lost workdays.  
**EH** = total hours worked by all employees during the calendar year.  
**200,000** = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

**Log of Work-Related Injuries and Illnesses.** The Log of Work-Related Injuries and Illnesses is used to classify work-related injuries and illnesses and to note the extent and severity of each case. The Log is used to record specific details about what happened and how it happened.

**Median days away from work.** Measure used to summarize the varying lengths of absences from work among cases with workdays missed. Half of the cases involved more days and the other half involved fewer days than a specified median.

**Medical treatment.** Treatment administered by a physician or licensed health care professional. Medical treatment does not include first aid treatment even if provided by a physician or licensed health care professional. Medical treatment includes managing and caring for a patient for the purpose of combating disease or disorder.

**Nature of injury or illness.** The nature of injury or illness identifies the principal physical characteristics of the injury or illness.

**Occupational illness.** Any abnormal condition or disorder, other than one resulting from an occupational injury, caused by exposure to environmental factors associated with employment. It includes acute and chronic illnesses or diseases that may be caused by inhalation, absorption, ingestion, or direct contact. The following categories are used by employers to

classify recordable occupational illnesses. The examples given are not to be considered the complete listing of the types of illnesses and disorders that are counted under each category as shown on the survey form.

1. **Skin diseases or disorders.**

Skin disease or disorders are illnesses involving the worker's skin that are caused by work exposure to chemicals, plants, or other substances.

Examples: contact dermatitis, eczema, or rash caused by primary irritants and sensitizers or poisonous plants; oil acne; friction blisters; chrome ulcers; or inflammation of the skin.

2. **Respiratory conditions.**

Respiratory conditions are illnesses associated with breathing hazardous biological agents, chemicals, dust, gases, vapors, or fumes at work.

Examples: silicosis, asbestosis, pneumonitis; pharyngitis; rhinitis or acute congestion; farmer's lung, beryllium disease, tuberculosis, occupational asthma, reactive airways dysfunction syndrome (RADS), chronic obstructive pulmonary disease (COPD), hypersensitivity pneumonitis, toxic inhalation injury, such as metal fume fever, chronic obstructive bronchitis, and other pneumoconioses.

3. **Poisoning.** Poisoning includes disorders evidenced by abnormal concentrations of

toxic substances in blood, other tissues, other bodily fluids, or the breath that are caused by the ingestion or absorption of toxic substances into the body.

Examples: poisoning by lead, mercury, cadmium, arsenic, or other metals; poisoning by carbon monoxide, hydrogen sulfide or other gases; poisoning by benzene, benzol, carbon tetrachloride, or other organic solvents; poisoning by insecticide sprays such as parathion or lead arsenate; poisoning by other chemicals such as formaldehyde.

4. **All other illnesses.** All other occupational illnesses.

Examples: heatstroke, sunstroke, heat exhaustion, heat stress and other effects of environmental heat; freezing, frostbite, and other effects of exposure to low temperatures; decompression sickness; effects of ionizing radiation (isotopes, x-rays, radium); effects of nonionizing radiation (welding flash, ultra-violet rays, lasers); anthrax; bloodborne pathogenic diseases, such as AIDS, HIV, hepatitis B or hepatitis C; brucellosis; infectious hepatitis; malignant or benign tumors; histoplasmosis; coccidioidomycosis.

**Occupational injury.** An occupational injury is a wound or damage to the body resulting from an event in the work environment. Examples: cut; puncture; laceration;

abrasion; fracture; bruise; contusion; chipped tooth; amputation; insect bite; electrocution; thermal, chemical, electrical, or radiation burn. Sprain and strain injuries to muscles, joints, and connective tissue are classified as injuries when they result from a slip, trip, fall, or other similar accidents.

**Privacy concern cases.** The following types of injuries or illnesses are privacy concern cases:

1. an injury or illness to an intimate body part or to the reproductive system;
2. an injury or illness resulting from a sexual assault;
3. a mental illness;
4. a case of HIV infection, hepatitis, or tuberculosis;
5. a needlestick injury or cut from a sharp object that is contaminated with blood or other potentially infectious material; and
6. other illnesses, if the employee independently and voluntarily requests that his or her name not be entered on the log.

**Recordable work-related injuries and illnesses.**

Any occupational injuries or illnesses that result in:

1. death, regardless of the time between the injury and death, or the length of the illness;
2. loss of consciousness;
3. days away from work;
4. restricted work activity or job transfer; or
5. medical treatment beyond first aid.

**Restricted work activity.**

Restricted work activity occurs when, as the result of a work-related injury or illness, an employer or health care professional keeps, or recommends keeping, an employee from doing the routine functions of his or her job or from working the full workday that the employee would have been scheduled to work before the injury or illness occurred.

**Sampling cell (strata).** The parts into which the sampling frame is partitioned, for the purpose of stratified sampling.

**Source of injury or illness.** The source of injury or illness identifies the object, substance, bodily motion, or exposure that directly produced or inflicted the injury or illness.

**Standard Industrial Classification (SIC).** A classification system developed by the Office of Management and Budget, Executive Office of the President, for use in the classification of establishments by type of activity in which engaged. Each establishment is assigned an industry code for its major activity which is determined by the product manufactured or service rendered. Establishments may be classified in 2-, 3-, or 4-digit industries, according to the degree of information available.

**Summary.** The summary form shows the work-related injury and illness totals for the year in each category.

**Symptoms, signs, and ill-defined conditions.** This division classifies

symptoms, signs, or abnormal results from laboratory or investigative medical tests or procedures. It includes those ill-defined conditions that cannot be classified elsewhere.

**Systemic diseases and disorders.**

This division classifies toxic and non-toxic disorders affecting systems of the body.

**Traumatic injuries and disorders.**

This division classifies traumatic injuries and disorders, effects of external agents, and poisoning. Generally, a traumatic injury or disorder is the result of a single incident, event, or exposure.

**Work environment.** The physical location, equipment, materials processed or used, and the kinds of operations performed by an employee in the performance of his or her work. The work environment includes the establishment and other locations where one or more employees are working or are present as a condition of their employment.

**Work-related injury or illness.** An injury or illness is considered work-related if an event or exposure in the work environment caused or contributed to the condition or significantly aggravated a preexisting condition. Work-relatedness is presumed for injuries and illnesses resulting from events or exposures occurring in the workplace, unless an exception specifically applies.

# **Census of Fatal Occupational Injuries**

The Bureau of Labor Statistics (BLS) in conjunction with state agencies developed the Census of Fatal Occupational Injuries (CFOI) program in 1992 to produce accurate, comprehensive, descriptive, timely, and accessible counts of fatal workplace injuries that occur during a given year. A fatality is counted in the state the death occurred regardless of the state of employment to alleviate duplication of reporting in the states.

The fatality census uses diverse sources to identify, verify, and profile fatal work injuries in an effort to compile counts that are as complete as possible. Source documents such as death certificates, workers' compensation reports, and Federal and State agency administrative records are cross-referenced to gather key information about each workplace fatality such as the particular occupation in which the fatality occurred, worker demographics, equipment or machinery involved, and circumstances of the event. Two or more independent source documents are used to verify the work relationship of each fatal work injury.

A work relationship exists if an event or exposure results in fatal injury or illness to a person on the employer's premises and the person was there to work; off the employer's premises and the person was there to work; or the event or exposure was related to the person's work or status as an employee. Fatalities that occur during a person's commute to or from work are excluded from census counts. Work is defined as legal duties, activities, or tasks that produce a product or result; and that which is done in exchange for money, goods, services, profit, or benefit. Although the scope of the fatality census is limited to work-related injuries, states may submit data on work-related fatal illnesses, such as heart attacks, that occur at work.

Information gathered by states participating in the CFOI program is used for statistical and research purposes only. The identifiers of all individuals and companies remain confidential according to BLS policy and confidentiality pledges to state source agencies. BLS and participating state agencies abide by any restrictions on followback or the release data imposed by source agencies.

Data compiled by the CFOI program are issued annually for the previous calendar year. These data are used by safety and health professionals, policy analysts, and researchers to prevent fatal work injuries by informing workers of life threatening hazards associated with various jobs, promote safer work practices through enhanced job safety training, develop new safety equipment, assess and improve workplace safety standards, and identify new areas for safety research.

**Note on industry and occupation classifications:** Beginning with the 2003 reference year, CFOI began using the 2002 North American Industry Classification System (NAICS) for industries and the Standard Occupational Classification system (SOC) for occupations. Prior to 2003, the program used

the Standard Industrial Classification (SIC) system and the Bureau of the Census occupational classification system. Because of the substantial differences between the current and previous systems, the results by industry and occupation in 2003 constitute a break in series, and users are advised against making comparisons between the 2003 industry and occupation categories and the results for previous years.

Chart A-1 shows workplace fatalities by event or exposure in Missouri in 2003 in all ownerships. Transportation incidents had the highest percentage of workplace fatalities with 56 percent. Contact with objects and equipment had the next highest percentage of workplace fatalities with 13 percent.

Chart A-2 illustrates fatal work injuries by location in Missouri in 2003 in all ownerships. Most (39 percent) of the fatal work injuries occurred on streets or highways. Farms was the next highest location for fatal work injuries with 22 percent. Industrial place or premises was the location in 14 percent of the fatal work injuries.

Chart A-3 shows occupations with the largest number of worker fatalities in Missouri in 2003 in all ownerships. Driver/sales workers and truck drivers was the occupation with the most worker fatalities with 41. Agricultural managers had the second most occupational fatalities with 28. Construction managers had the next highest number of worker fatalities with six.

Chart A-4 shows occupations in the construction industry with the highest number of fatalities in Missouri in 2003 in all ownerships. All other was the construction industry occupation with the highest number of fatal injuries with 17 or 65 percent. Construction managers was the occupation with the second highest number of fatal injuries in the construction industry with six or 23 percent. Roofers was the occupation with the third most fatalities in the construction industry with three injuries or 12 percent.

Chart A-5 illustrates fatality work injuries varied between men and women in Missouri in 2003. Men accounted for 144 of the 154 total fatal occupational injuries in Missouri in 2003. Transportation incidents was the event or exposure in 79, or 55 percent, of the fatal occupational injuries that involved men. Women accounted for ten of the 154 total fatal occupational injuries in Missouri in 2003. Transportation incidents was the event or exposure in seven, or 70 percent, of the fatal occupational injuries that involved women.

Chart A-6 shows the fatal work injuries in selected industries in Missouri in 2003. Trade, transportation, and utilities was the industry with the highest number of fatal work injuries with 38. The second highest industry was natural resources and mining with 34. The construction industry had the next highest number of fatal work injuries with 26.

Table A-1 shows fatal occupational injuries by industry and event or exposure in Missouri in 2003. There were 154 fatal occupational injuries in Missouri in 2003. Transportation incidents was the event or exposure responsible for 86 of the 154 fatal occupational injuries. Transportation incidents include highway, nonhighway, air, water, and rail fatalities. Contact with objects and equipment was the event or exposure that had the second highest number of fatal occupational injuries with 20. The agriculture, forestry, fishing and hunting sector (NAICS 11) was the sector that had the highest number of fatalities in 2003 with 34. Within the agriculture, forestry, fishing and hunting sector, crop production (NAICS 111) had 27 of the 34 fatalities. The transportation and warehousing sector (NAICS 48-49) was the sector that had the second highest number of fatal occupational injuries with 29. Within the transportation and warehousing sector, truck transportation (NAICS 484) had 25 of the 29 fatalities. The construction sector (NAICS 23) was the sector that had the third highest number of fatal occupational injuries at 26.

Table A-2 shows fatal occupational injuries resulting from transportation incidents and homicides in Missouri in 2003. There were a total of 86 fatal occupational injuries as a result of transportation incidents. The transportation and warehousing sector had the highest number of total transportation incidents with 27. Highway incidents accounted for 22 of these 27 transportation incidents. The agriculture, forestry, fishing and hunting sector had the second highest number of total transportation incidents with 19. Non-highway incidents accounted for 16 of these 19 transportation incidents. There were eight fatal occupational injuries as a result of homicides. Homicides by shooting accounted for six of the eight fatal occupational injuries.

Table A-3 presents the number and percent of fatal occupational injuries to private sector wage and salary workers, government workers, and self-employed workers by industry in Missouri in 2003. Private sector wage and salary workers may include volunteers and other workers receiving compensation. The transportation and warehousing sector had the highest number of fatal occupational injuries among the private sector wage and salary workers with 28, or 27.7 percent. The construction sector had the second highest number of fatal occupational injuries for private sector wage and salary workers with 20, or 19.8 percent. The numbers and percent of fatal occupational injuries for government workers include fatalities to workers employed by governmental organizations regardless of industry. The public administration sector (NAICS 92) had the highest number of fatal occupational injuries among government workers with four, or 40.0 percent. Self-employed workers include paid and unpaid family workers, and may include owners of incorporated businesses, or members of partnerships. The agriculture, forestry, fishing and hunting sector had the highest number of fatal occupational injuries among self-employed workers at 28, or 65.1 percent. The construction sector had the second highest number of occupational fatalities of self-employed workers at six, or 14.0 percent.

Table A-4 presents fatal occupational injuries by primary and secondary source of injury by major private industry sector in Missouri in 2003. The primary source identifies the object, substance, or exposure that directly produced or inflicted the injury. For transportation incidents, the source identifies the vehicle in which the deceased was an occupant. The secondary source of injury, if any, identifies the object, substance, or person that generated the source of injury or that contributed to the event or exposure. For vehicle collisions, the deceased's vehicle is the primary source and the other object (truck, road, divider, etc.) is the secondary source. For most homicides, the "bullet" is the primary source and the "perpetrator" is the secondary source. The total goods-producing sector had 75 total fatalities. Within goods-producing, the natural resources and mining major industry sector had the highest number of fatal occupational injuries with 34. Vehicles was the leading primary source in the total goods-producing sector with 37 total occupational injuries. Structures and surfaces was the leading secondary source in the total goods-producing sector with 13 fatal occupational injuries. The total service-providing sector had 69 total fatalities. Within service-providing, the trade, transportation, and utilities major industry sector had the highest number of fatal occupational injuries with 38. Vehicles was the leading primary source in the total service-providing industries with 44 fatal occupational injuries. Vehicles was also the leading secondary source in the total service-providing industries with 21 fatal occupational injuries.

Table A-5 shows fatal occupational injuries by occupation and event or exposure in Missouri in 2003. The occupation groups with the highest numbers of total fatalities in 2003 were transportation and material moving occupations with 49; management occupations with 37; and construction and extraction occupations with 17. Within the transportation and material moving occupations, motor vehicle operators accounted for 42 of the 49 fatalities. Within the management occupations, other management occupations accounted for 36 of the 37 fatalities. Within the construction and extraction occupations, construction trades workers accounted for 16 of the 17 fatalities. Transportation incidents was the event or exposure with the highest numbers of total fatalities at 86. Transportation incidents was the event or exposure in 39 of the 49 fatalities in the transportation and material moving occupations and in 19 of the 37 fatalities in the management occupations. Contact with objects and equipment was the second highest event or exposure for total fatalities with 20 total occupational injuries.

Table A-6 shows fatal occupational injuries resulting from transportation incidents and homicides by occupation in Missouri in 2003. The occupation group with the highest number of total fatal occupational injuries resulting from transportation incidents was the transportation and material moving occupations group with 39. The management occupations group had the second highest number of total fatal occupational injuries resulting from transportation incidents

with 19. There were eight fatal occupational injuries as a result of homicides. Homicides by shooting accounted for six of the eight fatal occupational injuries.

Table A-7 presents fatal occupational injuries by worker characteristics and event or exposure in Missouri in 2003. Of the 154 fatal occupational injuries that occurred in Missouri in 2003, 144 of the workers were men. White, non-Hispanic workers accounted for 137 of the 154 occupational fatalities. Workers between the ages of 35 to 44 had the highest number of fatal occupational injuries with 34. Wage and salary workers were 111 of the 154 fatalities. Transportation incidents was the leading event or exposure in all worker characteristics except for the 65 year and over age category and the Black, non-Hispanic race or ethnic origin category. Workers aged 65 years and over had seven occupational fatalities as a result of transportation incidents and seven occupational fatalities as a result of contact with objects and equipment. Black, non-Hispanic workers had three occupational fatalities as a result of transportation incidents and three occupational fatalities as a result of assaults and violent acts.

Table A-8 presents fatal occupational injuries by event or exposure and age in Missouri in 2003. The major events or exposures with the highest numbers of total fatal occupational injuries in 2003 were transportation accidents with 86, contact with objects and equipment with 20, and falls with 17. Of the 86 fatal occupational injuries where transportation accidents was the event or exposure, 24 occurred in workers aged 55 to 64 years. Of the 20 fatal occupational injuries where contact with objects and equipment was the event or exposure, seven occurred in workers aged 65 and over. Of the 17 fatal occupational injuries where falls was the event or exposure, four occurred in workers aged 35 to 44 years and four occurred in workers aged 45 to 54 years.

Table A-9 presents fatal occupational injuries by event or exposure and major private industry sector in Missouri in 2003. Transportation accidents was the primary event or exposure for both the total goods-producing sector at 35 and the total service-providing sector at 44. Contact with objects and equipment was the second highest event or exposure in the total goods-producing sector at 15. Falls, and assaults and violent acts were tied for the second highest event or exposure in the total service-providing sector with seven each.

<sup>1</sup> Classified according to the North American Industry Classification System, 2002.

<sup>2</sup> May include volunteers and other workers receiving compensation.

<sup>3</sup> Includes fatalities to workers employed by governmental organizations regardless of industry.

<sup>4</sup> Includes paid and unpaid family workers, and may include owners of incorporated businesses, or members of partnerships.

<sup>5</sup> Includes fatalities at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, 2002, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

NOTE: Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. Data for 2003 are preliminary.

<sup>1</sup> Classified according to the North American Industry Classification System, 2002.

<sup>2</sup> Includes fatalities at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, 2002, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

<sup>3</sup> The primary source identifies the object, substance, or exposure that directly produced or inflicted the injury. For transportation incidents, the source identifies the vehicle in which the deceased was an occupant.

<sup>4</sup> The secondary source of injury, if any, identifies the object, substance, or person that generated the source of injury or that contributed to the event or exposure. For vehicle collisions, the deceased's

vehicle is the primary source and the other object (truck, road, divider, etc.) is the secondary source. For most homicides, the "bullet" is the primary source and the "perpetrator" is the secondary source.

NOTE: Totals for major categories may include subcategories not shown separately. Dashes indicate no data reported or data that do not meet publication criteria. n.e.c. means "not elsewhere classified." Data for 2003 are preliminary.
